ABOUT ME

A Computer Science Master's student with 3+ years of professional development experience, currently pursuing a Master's degree in Computer Science and Information Technology at Lodz University of Technology (expected graduation 2026).

Proficient in C#, Java, and Python with hands-on experience in backend development (ASP.NET, Spring Boot), database design (MySQL, SQL Server), and RESTful API development. Familiar with Git version control, CI/CD workflows, and Agile methodologies (Scrum, Jira).

Strong problem-solving skills with demonstrated ability to work in fast-paced, collaborative environments and distributed teams across different time zones. Passionate about building scalable software solutions and continuously learning new technologies.

EDUCATION

Lodz University of Technology

Master / 2024–2026

Computer Science and Information Technology

Relevant Coursework: Software Development, AI and Machine Learning, Data Structures & Algorithms, Database Systems

Esigelec

Master / 2018–2020

Electronic Embedded System

Relevant Coursework: Embedded Systems Design, Microcontroller Programming, Real-Time Operating Systems

Nanjing University of Posts and Telecommunications

Bachelor / 2013–2017

Electronic Science and Technology

Relevant Coursework: Advanced Mathematics, Circuit Analysis, Signals and Systems, Digital Electronics

WORK EXPERIENCE

ITransition

2025 – 2026

Data Engineering Intern

Łódź, Poland

- Performed data collection, cleaning, and transformation using Microsoft Fabric platform and Python, processing 10M+ records with improved data quality and validation
- Implemented medallion architecture (Bronze-Silver-Gold layers) following data engineering best practices
- Collaborated with distributed teams across multiple time zones using Agile/Scrum methodology
- Participated in daily stand-ups, sprint planning, code reviews via GitHub, and knowledge sharing sessions
- Wrote maintainable, well-documented code following team coding standards and best practices
- Technologies: Python, SQL, Git, Jira, Microsoft Fabric, Agile/Scrum

Software Development Experience (Combined)

Software Developer

2020 – 2024

Beijing, China

- Developed client-server applications using C# with focus on networking, real-time data synchronization, and scalability
- Designed and implemented RESTful APIs and backend services handling concurrent user sessions
- Optimized database schemas and queries for performance improvement in MySQL and SQL Server environments
- Implemented CI/CD pipelines and participated in code reviews to maintain code quality
- Collaborated in Agile teams with daily stand-ups, sprint planning, and iterative development cycles
- Contributed to published applications with 500K+ combined downloads on Google Play Store
- Technologies: C#, Unity, ASP.NET, MySQL, Git, CI/CD, Agile methodologies

PROJECTS

Data Pipeline System

ITransition Internship | 2025-2026

- Built end-to-end data pipeline processing millions of records with Bronze-Silver-Gold medallion architecture
- Implemented data quality checks, validation rules, and monitoring for production environment
- Collaborated with team using Git workflow (pull requests, code reviews, branching strategies)

SKILLS

- | | |
|---|--|
| • Languages: C#, Java, Python, SQL | • Tools: GitHub, Jira, Confluence |
| • Frameworks: ASP.NET, Spring Boot | • Concepts: OOP, RESTful APIs |
| • Databases: MySQL, SQL Server | • Methodologies: Agile/Scrum, CI/CD |

I consent to the processing of my personal data for recruitment purposes in accordance with GDPR (EU 2016/679).
