PROFESSIONAL EXPERIENCE

Financial Analyst

NTT Poland 09.2021 - present

- Ownership of selected financial areas, including impact on P&L
- Responsibility for cash flow planning and liquidity control (short- and long-term)
- Managing FX exposure, including currency demand planning, execution of FX transactions and ongoing position monitoring
- Preparation and development of financial result components, including own analytical models supporting P&L structure
- Building and maintaining backlog-based analysis as a key input for forecasting processes
- Active participation in month-end closing (analysis of P&L components, identification and explanation of abnormal variances, proposing and initiating cost adjustments)
- Close cooperation with accounting team (verification of postings, accounting recommendations, identifying errors and coordinating corrections)
- Monitoring and controlling financial aspects of inventory, including valuation, amortization and anomaly detection
- Business partnering with departments (delivering ad-hoc analyses and providing recommendations supporting decision-making)
- Designing and developing advanced Excel models supporting financial analysis and reporting
- Automation and optimization of reporting processes to improve efficiency and accuracy
- Cooperation with external financial institutions (banks, insurance companies, auditors)
- Participation in process improvement and system implementation projects, including document workflow implementation and SAP rollout
