

Krystian Zielonka

.NET Developer

Lublin | 793 599 920 | kzielonka02@gmail.com

ABOUT ME

Software Engineering final year, master's student at Lublin University of Technology specializing in Java and C# backend development. Through personal projects, I've gained hands-on experience with containerization, CI/CD pipelines and cloud infrastructure which I actively apply by maintaining a home server. I'm currently seeking a developer position that lets me write software while staying hands on with the deployment and operations side.

PROJECTS

Distributed IoT Monitoring System | *ASP.NET Core, Go, Terraform, Azure* github.com/MKKL1/weather-station

- Built a cloud-based microservices architecture using ASP.NET Core and Go to collect, process, and serve real-time sensor telemetry.
- Managed relational and document data across PostgreSQL and CosmosDB, and secured the system with Keycloak.
- Provisioned Azure infrastructure with Terraform and automated containerized deployments through a GitHub Actions CI/CD pipeline.

Szampchat | *Spring WebFlux, Angular, RabbitMQ, Docker, Maven* github.com/MKKL1/chat-app

- Developed the backend of a real-time text and voice messaging platform, building a reactive Spring WebFlux API consumed by an Angular frontend and Android client.
- Integrated RabbitMQ for message routing, Redis for caching, and PostgreSQL for storage, backed by Keycloak for access management.
- Automated testing and deployment via GitHub Actions, integrating Cypress and TestContainers before deploying with Docker Compose.

3D File Sharing Platform | *Go, gRPC, Kafka* github.com/MKKL1/schematic-app

- Designed a Go-based microservices backend, utilizing gRPC, Kafka.
- Integrated MinIO for scalable 3D model object storage, alongside PostgreSQL, Redis, and Keycloak for data and identity management.

Recipe Sharing Website | *React, NestJS, MongoDB* github.com/MKKL1/recipe-website-project

- Developed a responsive single-page web application using React and TypeScript.
- Built a RESTful backend API using NestJS and MongoDB to handle user authentication and data persistence.

EDUCATION

Lublin University of Technology
Software Engineering, Master's degree

Lublin
2025-now

Lublin University of Technology
Software Engineering, Engineer's degree

Lublin
2021-2025

TECHNICAL SKILLS

Programming Languages: Java, C#, Python

Framework: ASP.NET Core, Spring Framework

Databases: PostgreSQL, CosmosDB

DevOps: Azure, Docker, Terraform, Git, GitHub Actions

Languages: Polish - native, English - B2
