

FILIP

ABOUT ME

I am a graduate of economics, where I gained solid knowledge in economics and finance. My professional experience includes work in the banking sector, where I developed skills in customer service, risk analysis, and working with various financial products such as loans. I also gained experience in an accounting department, enhancing my abilities in financial reporting and data analysis. Additionally, I worked as an analyst in pricing and master data processes, where I ensured data accuracy, supported process optimization, and contributed to the development of efficient financial workflows. These experiences have not only strengthened my analytical and financial skills but also inspired me to continue growing both in the field of finance and in data analysis.
