

ŁUKASZ BORODZIUK

SOFTWARE DEVELOPER

Profile

I am a Computer Science graduate at Lublin University of Technology with a strong focus on backend development using .NET technologies and relational databases. I have practical experience building RESTful APIs and web applications using C#, ASP.NET (Code First approach), and MS SQL Server through academic and personal projects. I am familiar with the basics of software design principles and common design patterns, and I am actively developing my understanding of how they are applied in real-world applications. I also have exposure to frontend development with React, which helps me better understand end-to-end application flow. I am currently looking for an opportunity as a .NET Developer where I can further develop my backend engineering skills and contribute to real-world software systems.

Education

● Lublin University of Technology

Lublin, City | 2022 - 2026

Bachelor of Engineering degree in Computer Science.

Projects

2025	RentToolBackend Backend for a neighborhood tool-rental platform developed as an engineering thesis project. RESTful API supporting tool listings, reservations, user roles, reviews, and a daily ranking system based on user reputation. Developed in a 3-person team with full responsibility for backend implementation. ASP.NET, C#, MSSQL, Docker
2024	SportCenterApp Full-stack application for managing a sports center, including RESTful API backend with MSSQL and a dynamic frontend interface with component-based views. C#, .NET, MSSQL, React, Vite, Bootstrap
2022	HotelLove Monolithic web application for hotel listing and booking management. C#, ASP.NET MVC
2025	AIShorts Application for automatic generation of short video content using AI and reinforcement learning. Python, Machine Learning, Reinforcement Learning
