Methods And Processes

Software design principles:

SOLID, DRY, KISS, YAGNI, Clean Code principles, Twelve-Factor App methodology

Frontend architecture & styling:

BEM methodology,
Component-driven development,
Separation of concerns (SoC),
Accessibility-driven development (A11y)

Paweł Podolski

Full Stack developer

Białystok, Polska

About

Experienced developer with **7 years of professional experience** building modern, accessible, and scalable web applications. For the past **3 years**, I have focused primarily on **frontend development (react, typescript)**, supported by a strong **full-stack background** in **python, flask**, and api-driven systems.

I value clean architecture, maintainable code, and well-designed components. I enjoy solving complex problems, improving existing codebases, and collaborating closely with cross-functional teams to deliver high-quality, business-oriented solutions.

Professional Experience (Full list on LinkedIn)

Esatto

2022 – Present

Frontend / Full Stack Developer

Worked on multiple client projects across e-commerce, HR systems, public-sector platforms, and internal AI initiatives. Primarily focused on frontend development while maintaining close collaboration with backend teams and contributing full-stack code when needed.

Selected projects:

- **E-commerce platforms**
Developed online stores using **Vanilla JavaScript and TypeScript**, implementing Figma designs within client-specific frameworks. Acted as **frontend architect** on one project, defining tooling and code structure under tight deadlines. Supported backend integrations, including minor **C#** backend tasks.
- **HR management system**
Migrated a complex internal tool from **Angular to React** while preserving full feature parity. The work involved analyzing existing Angular code, understanding business workflows, and rebuilding the application using modern React patterns and form validation libraries.
- **Public-sector collaboration platform**
Built and maintained a **React** application allowing users to track projects, communicate with teams, and share files. Implemented new features,

Workflow & collaboration:

Scrum, Kanban, Code review best practices, Incremental refactoring, Cross-functional teamwork

AI-related workflow:

AI-assisted development, AI coding tools, Prompt engineering, LLM prompt design & iteration

Education

Master's degree, Bialystok University of Technology
2007 – 2009

Bachelor's degree, Mathematics and Applied Computer Science
2004 – 2007

Courses

MS Foundry courses
AiDevs4

Back-end developer Python
Coders Lab 2018 – 2019

Languages

English - working proficiency, used daily in client communication and technical discussions

Polish - native

fixed bugs, and maintained the application while integrating **GraphQL APIs and a Strapi CMS**.

- **Healthcare user portal**

Developed accessible, form-heavy user interfaces for managing personal health data, with a strong focus on **usability for impaired users** and compliance with accessibility standards.

- **Internal AI agent solution**

Worked as a **full-stack** developer on an internal project building an agentic AI solution using **Azure OpenAI**. Contributed to backend services in **C#** and frontend interfaces in **React/Blazor**, and supported deployment and model management in Azure Cloud.

Technologies:

React, TypeScript, Vue, Vanilla JS, GraphQL, Next.js, Strapi, MUI, SCSS/CSS, Optimizely, Azure, C#, Vite, Vitest

Montrose Software

2022

Full Stack Developer

The project's main goal was to create a multimedia **entertainment application for children**. I was responsible for creating **front-end and back-end code**, integrating **external APIs**, and creating **Google BigQuery tables**.

Technologies:

Firebase, Google Cloud, React, React Native, CSS, TypeScript, Mixpanel

NCPS Solaris

2019–2022

Full Stack Developer / Team Leader

The primary role was developing a **Python-based web portal** enabling scientists to submit experiment proposals and book experimental time. I was responsible for writing **high-quality, standards-compliant backend code**, ensuring the solution met strict programming and architectural guidelines. Over time, I also became **the team leader of a small development team**, accountable for code quality, technical direction, and timely, reliable delivery.

Technologies:

Python, Flask, Flask-RESTX, Pytest, Click, LDAP3, Vue, Vuex, Vue Router, Vue-Bootstrap, Vue Testing Library, JavaScript, CSS, SCSS, Webpack, MongoDB, Docker, Docker-Compose, NGINX
