

RADOSŁAW KLUGE

DEVELOPER - REACT + JAVA

ABOUT ME

I am a software developer with over two years of experience in TypeScript (especially in React, Next.js) and practical knowledge of Java Spring Boot. I am a creative person with a strong sense of responsibility and good analytical skills. I perform well in stressful environments and am a proactive team player who builds strong working relationships.

SKILLS

Frontend:

TypeScript, React, Next.js,
TailwindCSS, Vite, Zustand,
Redux,
Shadcn/ui, MUI, ChakraUI,
axios,
Tanstack React Query,
Tanstack React Table,
React Hook Form, Zod,
React Router

Backend:

Java, SpringBoot, Maven,
MySQL, PostgreSQL, H2,
MongoDB, Liquibase,
Mapstruct

General:

REST Architecture,
Git/Github/BitBucket,
IntelliJ IDEA + AI Tools,
Postman/Bruno, Figma, Jira

LANGUAGES

Polish – Native

English – B2

WORK EXPERIENCE

PKP Informatyka | Junior developer | 2024.01 - now

Project 1 - React 19, Vite, Zustand, Shadcn/ui + Tailwind, Tanstack React Query + Table, React Router

A key achievement was convincing the team to Tanstack React Query and Tanstack React Table in this project and independently implementing both libraries, which significantly enhanced the performance of tables (from “unacceptable” to “well optimized”) and the efficiency of application state management.

Project 2 - React 19, Vite, MUI, Zustand, axios, Tanstack React Query, React Hook Form + Zod, React Router

I refactored a 6-year-old application. After refactoring, the code footprint was reduced by 40-50% and the overall customer experience improved (the application runs significantly faster).

Project 3 - Java 21, SpringBoot, PostgreSQL, Mapstruct

I was responsible for module connected to RabbitMQ, which retrieved data from other modules and applications (via migrators). The goal was to categorize them into the appropriate transaction types, map them to a single standard (mapstruct), and store them in a very large PostgreSQL database. The module represented sales summaries generated by the application's API. I have also debugged numerous older versions of the code.

EDUCATION

WSB in Warsaw | 2021-2022

Java Application Programming - Postgraduate Studies

WSB in Gdańsk | 2023-2026

Project Management - Master's Degree

Gdańsk University of Technology | 2015-2019

Transport (Railway Infrastructure) - Engineering Degree
