About

Frontend Engineer with 5 years of experience building web interfaces and product systems. I work across the full stack, designing and building APIs, integrating CMS platforms, and taking care of performance and accessibility end-to-end. Academic background in cybersecurity. I actively use AI tooling as part of my everyday workflow.

Experience

FRONTEND ENGINEER, DEEPSLEEP STUDIO; MIAMI, FL (REMOTE) - 09/2021-PRESENT

- Designed and shipped a membership-based community app. Covering auth, membership flows, QR check-ins, and push notifications, from zero to production.
- Led a critical billing migration from Hivebrite to Outseta, rebuilding broken Stripe customer mappings to ensure recurring payments continued without interruption. No re-entered card details, no lost revenue.
- Delivered over 30 client websites, building responsive interfaces and UI components, developing motion patterns, and integrating headless CMS infrastructure to support scalable content workflows.
- Contributed to Santa Anita Park in a small senior team, implementing high-performance search, tag-based revalidation, and server-side data fetching.
- Built serverless data pipelines integrating automated scraping, FTP/XML ingestion, and CMS synchronization.

FREELANCE WEB DEVELOPMENT; WARSAW / (REMOTE) - 01/2020-PRESENT

- Delivered custom websites and frontend solutions for small businesses, primarily using Next.js, Gatsby, and WordPress, including migrating legacy WordPress sites to modern frontend stacks to improve performance and reduce long-term maintenance overhead.

Skills

- **Frontend:** React, Next.js, TypeScript, JavaScript, TanStack Query, Capacitor, Gatsby
- **Backend & APIs:** Node.js, REST, GraphQL, SQL, Supabase, Server Actions, webhooks
- **UI & Styling:** Tailwind CSS, SCSS, shadcn/ui, Radix UI, Motion
- **CMS:** Sanity, Contentful, WordPress
- **Tooling & Delivery:** Git, Vercel, Cursor, Claude, Netlify, iOS/App Store deployment
- **Performance & Quality:** Core Web Vitals, accessibility, Lighthouse, SEO
- **Client & Delivery:** technical scoping, client communication, CMS training & handoff

Featured Projects

Santa Anita Park: High-traffic Next.js platform for one of the largest horse racing venues in the US.

Los Socios: End-to-end delivery of a membership app built with Next.js, Capacitor, Outseta, and Supabase.

Gulfstream Casino: Premium promotional website built with Next.js, featuring immersive animations, dynamic promotions, mobile-first UX, and optimized performance.
