PROFILE

Senior Frontend Engineer with 9+ years of experience building complex product interfaces, dashboards, internal tools, client-facing web apps, and AI-assisted workflows. Framework-flexible across modern TypeScript ecosystems, with a strong Vue background and recent hands-on React/Next.js experience. Strong in data-heavy UI, API-driven workflows, frontend-backend collaboration, component architecture, and maintainable testing practices across unit, integration, and E2E layers.

TECHNICAL SKILLS

AI & Automation	AG-UI Protocol, AI-assisted workflows, CopilotKit, OpenAI API, RAG concepts, serverless notifications
APIs & Integrations	API-driven workflows, Firebase, Firestore, Gmail API, GraphQL, REST, Telegram API
Backend & Integrations	API design patterns, FastAPI, Node.js, database fundamentals
Core Frontend	JavaScript, Next.js, Nuxt.js, React, Svelte, TypeScript, Vue 2/3
Dashboards & Data UI	Admin dashboards, charts, data-heavy screens, filters, internal tools, real-time views
Testing	Cypress, Jest, Playwright, Vitest
Tooling	Docker, Git, GitHub Actions, Spec-Driven Development
UI & Design Systems	CSS Modules, SCSS, Tailwind CSS, design tokens, responsive and accessible component design, shadcn/ui

SzpakLabs

JAN 2020 - MAY 2026

Founder / Independent Engineer — Frontend, AI & Product Prototypes

- Freelance Client Work, Product Experiments & AI/R&D Prototypes (Next.js, React, AG-UI, CopilotKit, TypeScript, FastAPI, PostgreSQL, Firebase Cloud Functions, Firestore, Telegram API, Cloudflare Workers, Vue 3, Nuxt.js)
- Owned freelance and prototype work across requirements clarification, architecture, estimation, implementation, demos, client communication, and delivery.
- Built an AI-assisted CRM prototype for small businesses, combining lead capture from chat/email/voice inputs, lead tracking, and conversational admin workflows through a CopilotKit-powered interface.
- Built a commissioned Telegram event management bot, actively used by the client for invitations, participant tracking, cost tracking, and operational updates.
- Built an R&D conversational landing page to showcase AI-assisted lead qualification and product discovery flows using Next.js, AG-UI/CopilotKit, FastAPI, PydanticAI, and PostgreSQL.
- Built custom websites, admin panels, and dashboards for client projects, covering content management, form workflows, notifications, and operational data views.
- Built serverless notification pipelines using Firebase and Cloudflare Workers, connecting web forms, backend workflows, and Telegram-based alerts.
- Used spec-driven and AI-assisted development workflows to break down features, isolate changes, and keep prototype/client delivery reviewable and maintainable.

Appstronauts

APR 2021 - FEB 2026

Frontend Engineer

- Multi-Project Frontend Engineering (Next.js, React, Vue 2/3, Nuxt.js, Svelte, TypeScript, Tailwind CSS)
- Worked across multiple client/product teams, quickly becoming productive in unfamiliar codebases and delivering frontend features across Vue, React, Next.js, Nuxt.js, Svelte, and TypeScript stacks.
- Developed data-heavy dashboards across Vue/Nuxt and React stacks, including charts, filtering, real-time views, and reusable UI patterns.
- Improved frontend maintainability by applying TypeScript across components, API data flows, forms, and shared UI logic.
- Built and maintained reusable UI components with Tailwind CSS, shadcn/ui, PrimeVue, and design tokens to improve consistency across product screens.
- Covered complex frontend flows with Vitest, Cypress, and Playwright tests, improving confidence during feature work and refactoring.
- Connected product UIs to REST, GraphQL, and Firebase backends, handling API-driven forms, real-time updates, and data-heavy dashboard screens.

Deep.BI

APR 2018 - FEB 2020

Frontend Developer

- Frontend Migration & Visualization (Angular 8, TypeScript, D3.js, Chart.js)

- Contributed to a legacy-to-modern migration of an analytics client panel, moving core UI flows from AngularJS 1.6 to Angular 8 while maintaining feature parity.
- Supported migration quality with component tests and performance profiling, helping preserve feature parity across complex analytics screens.
- Built custom analytics visualizations with Chart.js and D3.js to make engagement metrics and behavioral data easier to interpret.
- Developed a browser extension for behavioral analytics, rendering real-time heatmaps and click-tracking overlays with D3.js/SVG.
- Improved frontend performance in analytics-heavy views by optimizing data filtering, rendering, and visualization updates.

UAB Vamireh

MAY 2016 - MAR 2018

Fullstack Web Developer

- Vue.js Application Development (Vue.js, JavaScript, HTML/CSS)
- Developed a Vue.js customer accounting application that helped users manage client-related records through an interactive, component-based interface.
- Integrated Gmail API for automated email parsing and client request processing, turning inbox messages into structured workflow data.
- Implemented responsive UI designs ensuring cross-browser compatibility and mobile responsiveness.
- Maintained and improved corporate website frontend, including performance optimizations, responsive fixes, and third-party widget integrations.
- Frontend Migration & Event Promo Sites (Symfony, Twig, SCSS, Flexbox, Gulp, Nuxt.js 2, Express, MongoDB)
- Modernized a Symfony/Twig customer-facing website with SCSS/Flexbox and a Gulp asset pipeline, improving frontend maintainability, technical SEO health, and Core Web Vitals signals.
- Built full-stack event promo websites with Nuxt.js 2, Express, and MongoDB, giving organizers custom admin tools for maps, news, photos, and social hashtag streams.
