

Michał Matynia

AI Product Engineer | Full-Stack Developer | Agentic Systems, AI Tooling & E-commerce Integrations

Szczecin, Poland | +48 798985231 | mmatynia@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

AI Product Engineer and Full-Stack Developer with 10+ years of experience across AI-enabled products, full-stack engineering, front-end delivery, e-commerce integrations and database administration. Currently building StudiQ/Kangur, a gamified learning product with AI Tutor flows, learner web/mobile surfaces, admin tooling, Next.js APIs and shared cross-platform packages. Also building CLILauncherNative, a macOS launcher for multi-provider AI CLI workflows. Strong in architecture ownership, pragmatic delivery, agentic workflow design, marketplace automation and maintainable TypeScript systems.

TECHNICAL FOCUS

AI & agentic systems	AI Tutor, AI Paths/workflow canvas, prompt-driven tooling, OpenAI SDK, Gemini/GPT/Gemma/Ollama, knowledge/page-content assistance, image/TTS/OCR-oriented product surfaces
Full-stack web	Next.js App Router, React, TypeScript, Node.js, REST/Next.js APIs, Tailwind CSS, Radix UI, Framer Motion, next-intl, TanStack Query, CMS embedding
Backend, data & ops	MongoDB, Redis/ioredis, BullMQ, Zod contracts, Auth/MongoDB adapter, Vercel, Docker/self-hosted build patterns, OpenTelemetry, Playwright
Mobile & native tooling	Expo Router, React Native, EAS workflows, SwiftPM, SwiftUI/macOS app architecture, iTerm2 AppleScript execution, local diagnostics
E-commerce & integrations	Base.com/BaseLinker, Allegro, Tradera, product listings, import/export flows, product parameter recovery, marketplace automation
Quality & delivery	Vitest, Playwright, ESLint, TypeScript type-checking, route/security/contract checks, build optimization, observability, monorepo tooling

SELECTED AI & FULL-STACK PROJECTS

StudiQ / Kangur AI Learning Platform — [geminittestapp](#) | Repo: github.com/michalmatynia/geminittestapp

Next.js, React, TypeScript, Expo/React Native, MongoDB, Redis/BullMQ, TanStack Query, Zod, OpenAI/Gemini/Ollama, Playwright, Vitest, Vercel

- Own product architecture for a gamified learning platform combining learner web app, admin/content tooling, Next.js API routes, AI Tutor flows and a native mobile learner app.
- Structured the monorepo around a canonical root Next.js app, Expo Router mobile workspace and shared packages for contracts, core domain logic, API client and platform ports.
- Built learner-facing surfaces such as games, lessons, tests, competition, duels, learner profile, parent dashboard and admin authoring/observability modules.

AI Paths / Agentic Coding Platform — [within geminittestapp](#) | Repo: [docs/platform + docs/ai-paths](#)

Agentic workflows, visual graph/canvas state, run orchestration, resource leases, approval gates, forward-only execution

- Developed repo-internal agent discovery and approval concepts around capabilities, resources, approval gates, leases and append-only checkpoints for concurrent AI-assisted work.
- Refactored legacy bridge/compatibility state toward context-native single-writer patterns to stabilize graph editing, path switching and runtime behavior.

CLILauncherNative — AI CLI Orchestration Tool | Repo: github.com/michalmatynia/clilauncher

Swift 5.9, SwiftPM, macOS 13+, SwiftUI, iTerm2 AppleScript, Gemini/Copilot/Codex/Claude/Kiro/Ollama/Aider, Mongo-backed monitoring

- Built a native macOS launcher for running multiple AI CLI tools with provider-aware preflight checks, command preview, resilient iTerm2 launch sequencing, history and runtime diagnostics.
- Added profile/workbench orchestration, local transcript/diagnostic artifacts, session export, retention controls and provider-specific runtime validation.

E-commerce & Marketplace Automation | Repo: [2022-ecommerce + integration surfaces](#)

Base.com/BaseLinker, Allegro, Tradera, Playwright automation, product listings, import/export, Next.js commerce UI

- Delivered marketplace automation supporting product listing, catalog configuration, import/export workflows, product parameter recovery and one-click listing flows.
- Built an earlier e-commerce prototype using Next.js 13, React 18, TypeScript, SWR, Tailwind CSS and shop/product UI patterns.

PROFESSIONAL EXPERIENCE

Agentic AI Engineer for StudiQ | [studiqbeta.vercel.app](#) (*Self-employed*)

Sep 2025 - Present

Szczecin, Poland | Remote

- Lead end-to-end development of StudiQ, a gamified learning platform with AI tutors; the project is co-funded by the Polish Ministry of National Education as part of an EU initiative expanding access to AI education.
- Own architecture, implementation and testing with focus on scalable, maintainable product quality.
- Build configurable lesson systems, learner profiles and interactive minigames designed to increase engagement.
- Develop a shared product codebase across web, API, admin panel and mobile-facing capabilities.

Software Integration Engineer | Stargater.net (Freelance)

Szczecin, Poland | Remote

- Designed and delivered e-commerce integrations improving marketplace operations and sales workflows.
- Configured Base.com for a broad product catalog across multiple sales channels.
- Built a custom AI-powered sub-integrator enabling one-click product listing and workflow automation.
- Used Ollama and Gemma / GPT-based workflows to streamline post-production and operational tasks.

Front-End Developer | lastminute.com (Full-time)

Remote

- Analyzed CMS issues and delivered improvements based on Jira tickets and product requirements.
- Investigated and resolved bugs affecting performance, stability and user experience.
- Implemented UI improvements and front-end refinements in Next.js and React.

Full-Stack Developer | Milkbardesigners.com (Full-time)

Szczecin, Poland | On-site

- Built web applications supporting customer engagement and new business acquisition.
- Worked directly with clients to translate business needs into practical digital solutions.
- Delivered intuitive front-end interfaces and reliable back-end functionality for 3D architectural visualization projects.

Database Administrator | Procter & Gamble (Full-time)

Dublin, Ireland | On-site

- Managed SQL database administration tasks focused on reliability, performance and operational continuity.
- Monitored environments, proactively diagnosed issues and carried out cleanup and maintenance activities.
- Handled support tickets and client information workflows to improve response quality and user satisfaction.
