WORK EXPERIENCE

JUNIOR TEST SPECIALIST

Atos - since May 2023

- Performed manual testing of complex web application in the aviation industry, ensuring compliance with functional and business requirements.
- Conducted requirements analysis to design, update and maintain comprehensive end-to-end test cases, supporting both manual and BDD approaches.
- Worked in close cooperation with business analysts to clarify requirements and improve overall product quality.
- Acted as a bridge between business analysts and automation engineers, helping the team understand domain-specific rules.
- Logged, tracked, and monitored defects in Jira, providing detailed reports.
- Onboarded new team members, providing guidance, knowledge transfer and support to accelerate their integration.
- Contributed to the team's transition to BDD by creating and refining Gherkin scenarios, ensuring business requirements were captured in a clear, testable format while supporting alignment between business analysts and automation testers.

GLOBAL DATA ANALYST (QUALITY CONTROL)

IQVIA

October 2019 - April 2023

- Performed manual testing of online surveys for the pharmaceutical market.
- Reported and tracked defects to support timely resolution and improved product quality.
- Developed automation scripts in VBA and Python to validate Excel-based data files, enhancing efficiency and accuracy in data quality checks.
- Collaborated closely with business analysts to clarify requirements, and ensure alignment with business needs.
- Provided support to project managers, programmers and the analyst team, contributing to effective communication and smooth project delivery.
