- Playwright
- Jest
- OAuth
- Zustand
- React Query
- Code Review
- Monorepo
- CI/CD

ABOUT ME

With several years of experience delivering commercial software solutions for international clients, I specialize in building high-quality applications using React and React Native. During my time at Selleo, I contributed to a variety of complex projects, collaborating closely with cross-functional teams and applying best practices in architecture, performance optimization, and user-centric development. I'm committed to continuous improvement, staying current with modern frontend technologies, and consistently elevating the quality of the products I work on. Outside of work, I enjoy soccer, gym, and spending time outdoors.

EXPERIENCE

Frontend Engineer

07.2022 - currently

Selleo Web and Mobile Software Development

Project: Music entertainment and management

Team size: 7

A comprehensive solution for organizing and managing live projects, improving collaboration between artists, teams, and venues.

Key Contributions:

- Centralized itineraries, day schedules, travel & accommodation, users roles, files, forms, and messaging in a web & mobile apps.
- Implemented real-time updates to replace spreadsheets and scattered chats.
- Streamlined venue coordination and minimized last-minute errors with automated reminders, notifications, and access controls.
- Led end-to-end delivery, owned majority of the frontend codebase.
- Built unified calendar with cross-team visibility and day plans.
- Communicating with the team lead and client to align scope and priorities, provide estimates, and discuss risks early.

Tech Stack:

- React, React Native, TypeScript, Expo & EAS, Git, Monorepo architecture, REST API, Google API services, Nativewind, Sentry, Stripe, Playwright

Clients I collaborated with were based in:

United States

United Kingdom

Poland

LANGUAGES

Polish - Native

EDUCATION

Academy WSB

Computer science

2023 - 2023

Project: Learning & Operations Platform

Team size: 5

A cross-platform mobile and web app delivering company training content, assessments, and day-to-day operations in one place.

Key Contributions:

- **Unified content delivery:** Videos, quizzes and other content types lessons with progress and completion flows.
- **Company-aware access:** Multi-company context and tailored content per organization.
- **Authentication & onboarding:** Secure sign-in, password flows, and guided onboarding.
- **Real-time UX:** Hooks-based data fetching, optimistic UI, and notifications.
- **Cross-platform delivery:** iOS, Android, and PWA (web) from a single codebase with EAS build pipelines.

Tech Stack:

- React, React Native, TypeScript, Expo & EAS, Git, Monorepo architecture, REST API, Nativewind, Zustand, i18next, Jest, Expo Web

Other projects

Project: Learning Management System (LMS)

Team size: 6

Contributed to the development of a modular LMS platform, including user workflows, course management functionality, and frontend interface refinement. Improved usability and supported the adaptation of the system for multiple client requirements.
