Interests:

Traveling to the most interesting corners of the globe

About me

Experienced professional with strong leadership, communication, and problem-solving skills developed through management roles and extensive international experience, including travel to over 60 countries. Exposure to diverse cultures has strengthened my adaptability, open-mindedness, and ability to work effectively in dynamic environments. Passionate about technology and continuously developing expertise in software development and AI-driven engineering.

Leading stack

React, Typescript, Next.js, TanStack, React Native, TypeScript, Tailwind

AI tools

Strong knowledge of agentic coding methodologies and AI-driven spec coding practices. Hands-on experience using **Claude Code**, **Codex**, and **Copilot** to accelerate software delivery, automate implementation tasks, generate production-ready code, and support iterative engineering workflows.

Experience

<u>Mente.io – Fullstack Developer</u>	11.24-Present
Prediction market, AI travel planner.	
· Developing scalable and high-performance applications using Next.js, with a focus on SSR and SEO optimization. · Enhancing SEO by integrating dynamic metadata, proper HTML structure, semantic code, and working with Google Tag Manager and Google Analytics. · Building and optimizing RESTful APIs with a focus on performance, scalability, and maintainable architecture. · Refining rendering strategies using SSR to maximize performance and SEO compliance.	
<u>Tronity – React Native/Vue/Node.js Developer</u>	03.23-10.24
Electric vehicles digital solutions - international team.	
· React Native: Developing scalable mobile applications using React Native, focusing on cross-platform compatibility and delivering a smooth user experience. · Vue: I build platforms in Vue.js (using both Vue 2 and Vue 3, including the Composition API) that allow users to browse, analyze, and generate detailed reports. My approach emphasizes modular architecture to ensure scalability and easy maintenance. · Node.js: On the backend, I utilize Node.js with NestJS to design and improve RESTful APIs and endpoints, ensuring efficient data processing and real-time functionality.	
<u>AboDeinauto – React/Next.js Developer</u>	03.21-03.23
Car rental service - international team.	
As a Frontend Developer at abodeinAuto, I played a pivotal role in crafting and evolving the user interface of their website. My responsibilities included:	
· Development: Creating responsive, visually appealing, and intuitive interfaces to ensure optimal user experiences across various devices.	

- Performance optimization: Implementing techniques to enhance the speed and efficiency of the website, contributing to improved responsiveness and user engagement.
- Testing and Troubleshooting: Actively participating in functionality testing, identifying and resolving bugs to maintain a high-quality product.

TSS – Frontend Developer

03.22-12.22

- I independently led a project built with **Next.js**, where I integrated the Recharts library to deliver dynamic and interactive data visualizations. The project focused on creating responsive and high-performance charts, providing users with clear insights from complex datasets.
- Project Support: I provided ongoing support for multiple React-based projects, handling bug fixes, optimizing performance, and assisting with feature development. My role ensured the smooth operation of these projects and contributed to delivering quality improvements.

Smart Oak Projects – Frontend Developer

07.20-04.22

- Creating a platform for gathering young people with mental problems and carrying out joint projects. Creating Landing Pages for the Foundation. Support in developing mobile application.

Technologies: React, TS, Gatsby, Gsap, React Native.

Personal Projects

Futbolovo – Football Events & Services Platform

<https://futbolovo.net>

- Designed and developed a web platform aggregating football-related events, venues, academies, and services in one place.
 - Built an interactive map enabling users to discover local tournaments, pitches, training academies, and football services.
- Implemented features for organizers and businesses to publish events, promote services, and increase visibility.
- Developed full-stack application using Next.js with custom Node.js server and analytics stack (GTM, GA4, Consent Mode).
 - Platform is actively used by real users and organizers to browse and publish football-related content.
 - Continuously improving product based on user feedback and real usage.

Education

Warsaw University of Technology

10.2010-10.2016

Faculty of Transport - Specialisation: Safety Engineering and Ecology
