Gabriel Domanowski

Full-Stack Engineer

PROFESSIONAL SUMMARY

Full-stack developer with experience in Python, Go, Django, AWS, and front-end React and Tailwind. I've built cloud-based systems, solutions for HealthTech, ERP, marketing automation, and blockchain projects.

EXPERIENCE

FULL STACK DEVELOPER

Jul 2024 — Dec 2025

Montrose Software

- ERP system: optimized Django ORM queries, improved GraphQL requests, implemented backend and frontend features.
- AI solution for HealthTech: led the team, designed technical solutions, worked with OpenAI and Streamlit, wrote accuracy tests.
- File Management System (HealthTech): worked with React, Celery and Django.

SELF-EMPLOYED

Jan 2023 — Present

DevAction

- Web development, including:
- services using WebSockets,
- SSE (Server-Sent Events) for around 10,000 users,
- maintaining a stateless approach;
- Process automation(Selenium, Crawlers, Python, API);
- Platform and DevOps support, including:
working with GitLab CI and kubernetes + rancher,
- Work on integration POS system with AI(Offer generator, Dynamic Pricing) - LangGraph, Python, FastAPI, Postgresql, RAG
- Created platform game(Go, Event Sourcing, Supabase, Websockets)

SOFTWARE DEVELOPER

Sep 2023 — Nov 2023

Bright Coders' Factory

- Prepared to pass Snowflake exam.
- Helped develop workshop legacy/greenfield database migration to Snowflake.
- Conceptual work to create chat with video knowledge Airflow + Snowflake + OpenAI, prepared simple flow from raw data to general sentiment outcome per video.
- Created backend Acai soft project. Wrote REST and connected data from NoSQL database.
- Wrote unit tests and integration tests.

SOFTWARE DEVELOPER

Mar 2023 — May 2023

Looksoft

- Delegated to Goodsafe project securing document manager by cryptography.
- Wrote Lambdas, designed NoSQL table in DynamoDB and structure.
- Participated in Code Review, wrote rules in Terraform.
- Wrote REST and used Swagger.
- Tested API with Postman.
- Wrote unit and integration tests.
- Worked with OAuth, MFA.

CO-CREATOR/FULL-STACK DEVELOPER

Dec 2020 — Oct 2022

Blockchain

- Smart contracts (Launchpad, Farms, Withdraw)
- Backend for user and transaction statistics
- React frontend, Tailwind
- Designing NoSQL(MongoDB) models
- Blockchain integration and operation monitoring(Off-chain solution)

SOFTWARE DEVELOPER

Grupa Wirtualna Polska

Jan 2018 — May 2021

Wrocław, woj. dolnośląskie, Polska

- Worked with Python and Go on advertising and marketing automation systems
- Helped migrate services from bare metal to the cloud
- Supported system maintenance, debugging, and performance optimization
- Performed code profiling and identified memory leaks
- Developed and maintained internal services
- Created frontend components for marketing automation
- Analyzed datasets to detect discrepancies and generate business reports
- Took over and maintained services from another team to reduce their workload
- Participated in software testing and verifying system performance
- Collaborated on creating a new, more efficient code review process
- Prepared Proof of Concept features (e.g., WYSIWYG AdContent module)

EDUCATION

TECHNICAN

IT Colleague

Sep 2014 - May 2018

UNDERGRADUATE

University Of Economics Wrocław

Sep 2023 - Present

- Management

SKILLS

Python(*Advanced*), Go(*Intermediate*), PostgreSQL(*Intermediate*), Cloud Computing(*Intermediate*), API Development(*Intermediate*).
