

REMIGIUSZ SOWJAK

PROFILE

Highly trained and experienced IT support professional with proven experience in putting expertise to practice, having outstanding communication skills to interact both with clients and company. Known for being agile, sharp and able to improvise creative yet professional solutions.

EXPERIENCE

IT SUPPORT SPECIALIST - HCL POLAND - CRACOW - 2016 - PRESENT - BEFORE THAT - FUJITSU, IBM AND HONEYWELL IT SPECIALIST ALSO SCHOOL AND UNIVERSITY TEACHER OF ENGLISH AND GERMAN

Analyzed system problems, ran preventive tests, performed troubleshooting and trained Staff as part of the preventive measures.

Key Performance:

- Performed maintenance on copy machines, xerox scanner, printers, etc
- Performed server updates on a regular basis.
- Performed troubleshooting, diagnosing, solving and replacing parts.
- Maintenance and Upgrades: repaired and upgraded old installed systems; configured new systems.
- Documented the history of requests.
- Continuously up-to-date regarding software.
- Customer support: established solid work interactions with customers and employees alike
- Assembled information and customer feedback to clarify client requirements

Also skilled Fiber Optic Engineer with experience in distributed sensing technologies to support the design, deployment, and maintenance of fiber-based heat and leak detection systems. This role is critical to enhancing the operational integrity and safety of thermal energy and fluid transport systems through real-time fiber optic monitoring.

Key Responsibilities

- Design and implement fiber optic sensing systems for Distributed Temperature Sensing (DTS) and Distributed Acoustic Sensing (DAS) applications.
- Integrate fiber optic monitoring into energy infrastructure.
- Perform system configuration, calibration, and commissioning for heat and leak detection applications.
- Conduct fieldwork, including installation supervision, testing, and fault localization.
- Collaborate with mechanical, electrical, and computer engineers to ensure complete and reliable monitoring solutions.
- Analyze data to detect anomalies, identify leak locations, and monitor thermal profiles.
- Prepare technical documentation, including design drawings, wiring diagrams, user manuals, and maintenance protocols.
- Ensure all systems meet safety, reliability, and regulatory standards relevant to energy infrastructure.
- Support clients with remote diagnostics, performance reporting, and ongoing system optimization.

Qualifications

- Strong knowledge of fiber optic principles, sensors, and testing equipment.
- Familiarity with industrial communication protocols and integration with SCADA or DCS systems.
- Experience with thermal system monitoring, leak detection algorithms, or related analytics.
- Proficient in interpreting and analyzing fiber optic sensor data.
- Strong problem-solving skills and field troubleshooting ability.
- Willingness to travel to project sites, including industrial or remote locations.

EDUCATION

8/72 Radomska Street Sosnowiec 41-219 Poland Tel. 664 508 303 martinremy655@gmail.com
UNIVERSITY OF SILESIA - MASTER OF ARTS - ENGLISH AND GERMAN
PHILOLOGY - 1997, IT COMPUTER STUDIES

- MA in any of the many IT areas of study
- Computer science and programming BS.

SKILLS

Functional Skill Areas -

- MS Windows Os, Windows Server 2003/2008, MS Outlook/Exchange
- Oracle, Linux, MySQL, Nexus, IIS, Apache
- Basic SQL Server Support
- Pc Hardware, Printers, Laptops
- Networking components
- English, German, French fluent
- Objective - having the willingness to learn and grow personally and professionally, I am looking for a position in a company that needs and values quality customer service and system maintenance.
- Driving license
