

Sebastian Daszewski

Fullstack Developer

SUMMARY

Fullstack Developer with AI-first mindset and experience building modern web applications using React, Next.js, NestJS, and PostgreSQL. Since 07.2023, I've worked across frontend and backend roles, delivering scalable, responsive, and maintainable solutions. Skilled in JavaScript, TypeScript, Tailwind CSS, Prisma, and REST/GraphQL APIs. Passionate about clean code, modern architecture, and AI integration. I thrive in collaborative teams and enjoy turning complex ideas into efficient digital products.

PROJECTS

SlimAI

Website: <https://slimai.app/en>

Developed the complete backend architecture for an AI-powered health and nutrition platform using NestJS, PostgreSQL, and Prisma. Integrated multiple AI services (OpenAI API, DeepSeek, Perplexity) to provide intelligent nutritional analysis and personalized recommendations. Implemented Elasticsearch for advanced product search, Firebase Cloud Messaging for smart notifications and comprehensive health tracking features including calorie monitoring, fasting periods, and exercise logging.

AI in Human Resources

Web App (dev version): <https://hr-hubs-caia.web.app/>

A platform designed to assist users in defining their career paths with the help of artificial intelligence. The application analyzes user input, preferences, and skills to provide tailored career recommendations and insights, making it easier for individuals to navigate their professional development journey.

I was responsible for frontend optimization, improving application performance and user experience, as well as implementing new features and enhancing existing functionalities to support the platform's continuous development.

Websonar

App: <https://websonar.io>

Developed a high-performance website and API monitoring platform using Next.js, Tailwind CSS and NestJS with PostgreSQL and Prisma. Implemented a real-time monitoring engine for HTTP, TCP, and DNS protocols using BullMQ and Redis to handle concurrent health checks efficiently. Features include automated SSL certificate tracking, customizable JSON/keyword response validation, and public status pages with interactive uptime analytics powered by Recharts. Integrated Stripe for subscription management and a multi-channel notification system via Mailgun and Discord to ensure instant incident alerts.

EXPERIENCE

[05-2025 - PRESENT] NETICAT
Fullstack Developer

Building full-stack web applications with a focus on modern front-end and back-end technologies. Developing and maintaining scalable APIs using NestJS, ensuring efficient client-server communication. Collaborating with teams to deliver responsive, high-performance solutions and writing clean, maintainable code in a fast-paced environment.

[11-2024 - 04-2025] JOINTHUBS
Front-end developer

Developing responsive and user-friendly web applications while ensuring seamless experiences across devices. Collaborating with teams to create visually appealing and functional front-end solutions. Optimizing performance, troubleshooting issues, and writing clean, well-documented code following best practices. Continuously improving skills and contributing to innovative projects in a dynamic environment.

[07-2023 - 09-2024] DEVSTOCK
Junior Front-end developer

Developed and maintained responsive web applications using modern front-end technologies like HTML, CSS, JavaScript, and React. Worked closely with designers and backend developers to implement features and enhance user experience. Optimized code for performance, accessibility, and cross-browser compatibility while participating in code reviews, debugging, and testing. Contributed to reusable components and improved development workflows.

[11-2017 - PRESENT] MINISTRY OF NATIONAL DEFENSE
Soldier

Serving in the Territorial Military Service as a light infantry section commander, leading, training, and supervising a team to maintain operational readiness. Participated in defense exercises, emergency response, and community support missions.

EDUCATION

[2016 - 2021] MARIA CURIE-SKŁODOWSKA UNIVERSITY
Master's Degree in Internal Security

As part of my diploma thesis, I researched and analyzed issues of corruption in ancient Rome and the role of gladiatorial games in Roman society.
