PROFILE

I am a software developer with experience in building applications across various technologies. For the past 13 months, I have been developing my own platform for finding sports coaches with social media features (Trainee). Currently, I focus on backend development, continuously improving my skills in this area, and I am ready to work in a team and quickly adapt to new technologies.

SKILLS SUMMARY

- • • Software Engineering
- • • C#
- • • ASP.NET Core (.NET)
- • • Blazor (WebAssembly)
- • • Entity Framework Core
- • • REST API
- • • PostgreSQL, T-SQL, MySql, LiteSQL
- • • Git
- • • React
- • • Docker
- • • English
- • • Game Development

Knowledge of XUnit, Moq, HTML 5, CSS, Tailwind, Bootstrap, Github Copilot, ClaudeCode

BARTOSZ WŁOSZEK

FULLSTACK .NET DEVELOPER UNITY DEVELOPER

WORKING EXPERIENCE

Full Stack .NET Engineer | Blazor

Creator of own product (SaaS)

April 2025 – Present (1 year 1 month)

- Designed and developed a trainer search platform using ASP.NET, Blazor, Entity Framework, and PostgreSQL
- Sole developer responsible for end-to-end delivery, including architecture, backend, frontend, and database design
- Built scalable application structure and implemented core business logic and search functionality
- Managed full development lifecycle, from concept to deployment

Project link: (demo) <https://trainmee.pl>

Unity VR / Full Stack Engineer | .NET, React, ESP

Freelancer for private person

Jun 2025 – Present (11 months)

- Developed a shooting range simulator in Unity VR
- Implemented application logic including a custom Service Architecture
- Built backend server using .NET with TCP/IP, UDP and MQTT
- Developed a frontend application using Vite React TypeScript - administrator panel to control Unity application
- Run servers (backend and frontend) on Raspberry Pi 5
- Integrated hardware components using ESP32
- Improved communication of ESP32, Server, Unity and Frontend - designed and recreated using binary data format using MQTT and UDP
- Integrated LiteSQL into VR Application to store individual results

Project is Work In Progress (No released).

Unity Developer / .NET Developer

VCC Foundation | Remote

Feb 2025 – Oct 2025 (9 months)

- Developed a VR training application in Unity, implementing interactive scenarios and simulation logic
- Implemented new features
- Improved system stability and refactored architecture for better scalability and maintainability
- Contributed to system architecture design and development of a custom multiplayer system
- Built and maintained custom CI/CD pipelines for Windows, VR, and WebGL builds using Windows WPF
- Developed backend services using .NET
- Created Blazor prototype page
- Handled localization system

Application preview: <https://youtu.be/aCV8ZyiMruw>

Unity Instructor (EU-funded training program)

Feb 2, 2025 – Feb 15 2025

Zielona Góra | On-site

- Conducted Unity classes at a school as part of an EU-funded program
- Introduced participants to the fundamentals of C# and game development
- Supported students in building simple game projects

TRAINING, COURSES, CERTIFICATIONS, AND EVENTS

Warsaw GameJam

2023 Warszawa
2024 Warszawa

Kraków Hackaton

2022 Kraków
2023 Kraków
2024 Kraków
2025 Kraków

Arduino Programming Workshop (2018)

Palace GameJam (2017)

Tech Lead Unity Developer

ZSerca Studio | Remote

Jan 2024 – Feb 2025 (1 year 1 month)

- Developed a narrative-driven simulation game (2D/3D) in collaboration with artists and a game designer
- Sole programmer responsible for implementing and improving core gameplay systems
- Worked closely with the design team to iterate on gameplay mechanics and player experience
- Integrated tools and frameworks including DOTween, Articy, Firebase, and Zenject

Steam link ([Link](#))

Unity Developer

VCC Foundation | Remote

Sep 2022 – Sep 2023 (1 year 1 month)

- Implemented scenarios based on domain-specific documentation
- Integrated gameplay mechanics into scenario-driven workflows
- Integrated Oculus SDK and created VR Application basing on desktop app

Application preview: <https://youtu.be/aCV87yiMruw>

Unity Developer

DBR77 | Remote

Jun 2021 – Aug 2023 (2 years 3 months)

- Developed a 3D studio application for WebGL and VR and Desktop
- Designed and implemented core mechanics and application features
- Maintained and improved system architecture
- Delivered parallel development for Meta Oculus Quest 2
- Development in Industry Sector (Robotics, Digital Twin)

Application demo: <https://www.youtube.com/watch?v=cDSeWIWG6Gw>

Junior Unity Developer

Reality Unit | Lublin | Hybrid

Sep 2020 – May 2021 (9 months)

- Continuously improved knowledge of software architecture and development best practices
- Supported development of mobile Unity projects
- Independently delivered a WebGL project end-to-end, including client communication, testing, bug fixing, and plugin integration
- Participated in and co-organized industry events, including a tri-game tournament

Solo developed first project: <https://www.siatex.info/konfigurator-3d>

EDUCATION

Lublin University of Technology – Computer Science

Engineer (BEng)

Oct 2017 – Mar 2021 (3 years 6 months)

I agree to the processing of my personal data provided in this application for recruitment purposes in accordance with Regulation (EU) 2016/679 (GDPR).
