

Adrian Dumin

Wrocław, Poland | +48 731 609 907 | adrian.dumin@gmail.com

PROFESSIONAL SUMMARY

Data and financial services professional with experience in global investment banking environments, specializing in instrument reference data, data governance, and regulatory alignment. Proven ability to drive data quality, optimize operational workflows, and support front-to-back business functions. Strong analytical mindset with growing focus on data validation frameworks, testing methodologies, and foundational knowledge of AI and machine learning concepts.

PROFESSIONAL EXPERIENCE

Credit Suisse / UBS — Data Steward

Wrocław, Poland | Feb 2022 – Present

- Own and govern static instrument reference data across multiple asset classes, ensuring full compliance with regulatory and internal control frameworks
- Design and implement data quality controls, validation checks, and testing procedures to proactively identify inconsistencies and reduce operational risk
- Lead data analysis initiatives supporting trading, risk, and compliance functions, translating complex datasets into actionable insights
- Drive process optimization projects, improving data accuracy and reducing manual intervention through automation and structured workflows
- Develop and deliver internal training programs on data governance, quality assurance, and operational best practices
- Collaborate with cross-functional stakeholders including IT, risk, and front office to ensure data integrity across systems

Testing Contributions & AI Knowledge: - Introduced structured data testing frameworks to validate large-scale financial datasets - Strengthened data quality processes through systematic validation and reconciliation approaches - Completed coursework in AI and machine learning, with focus on anomaly detection and data-driven automation concepts

Credit Suisse — Instrument Reference Data Intern

Wrocław, Poland | Nov 2021 – Jan 2022

- Supported governance and maintenance of critical financial instrument data
 - Performed data validation and reconciliation across internal systems and external vendors
 - Partnered with data providers to resolve discrepancies and improve data reliability
 - Assisted in building foundational data quality checks and reporting processes
-

Paragliding Lodge — Volunteer

Soča Valley, Slovenia | Sep 2021 – Oct 2021

- Contributed to operational improvements through property renovation and maintenance
 - Demonstrated adaptability and teamwork in an international, fast-paced environment
-
