SUMMARY

Frontend Engineer with 4+ years of experience building modern web applications using React and TypeScript. Specialized in developing performant user interfaces and translating UI/UX designs into production-ready solutions. Experienced in code reviews, Agile environments, and direct collaboration with clients. Strong focus on clean architecture, usability, and continuous improvement.

SKILLS

Core: React, Next.js, TypeScript

Styling: HTML, CSS, Sass, Tailwind, Styled-components

UI Libraries: Shadcn, Ant Design, Mui

State & Data: Redux Toolkit, TanStack Query, Zustand, Nuqs

AI: Claude Code, Cursor, GPT Codex

Testing: Jest, Vitest, Playwright, React Testing Library

Tools: Git, Docker

EXPERIENCE

Frontend Engineer

Softwebo Sp. z o.o. | June 2025 - Present

- Developing and maintaining web applications using React and TypeScript
- Translating UI/UX designs from Figma into responsive and production-ready interfaces
- Conducting code reviews to improve code quality and maintain best practices
- Collaborating directly with clients to define requirements and improve product usability
- Initialized end-to-end testing (Playwright), increasing test coverage by 30%
- Improved team workflow by introducing process improvements in Agile/Scrum practices

Frontend Developer

DAC Software Sp. z o.o. | February 2022 - June 2025

- Developed and maintained web applications using React and modern frontend technologies
- Built reusable UI components based on design systems and Figma mockups
- Collaborated within Agile (Scrum) teams to deliver new features and improvements
- Debugged and resolved issues reported by QA, improving application stability
- Participated in code reviews, contributing to team knowledge sharing and code quality
- Proposed and implemented a refactor of CMS functionality on the main page

Automation Engineer

Doehler Sp. z o.o. | 2019

PROJECTS

AI Nutrition & Workout App (React, Next.js, Supabase)

- Built an advanced web application for managing diet and workout plans with AI-powered features
- Implemented dynamic UI, complex state management, and personalized user interactions
- Implemented end-to-end and unit testing (Playwright, Vitest)
- Designed a responsive and performant interface with a focus on usability and user experience
- Used in real-life scenarios to track workout and nutrition progress
- Live app: [AI Nutrition & Workout App](#)
- More details: [GitHub](#) (README)

Video demonstrations (YouTube):

- AI nutrition flow: [Watch](#)
- Workout flow: [Watch](#)
- Additional features: [Watch](#)

Interactive CV (React, Express.js)

- Built an interactive web CV showcasing frontend skills and projects
- Designed creative sections inspired by e-commerce, game interfaces and interactive animations
- Live demo: [Marcin-Kowalczyk/CV](#)

COMMERCIAL PROJECTS

- Qarson.fr - car sales platform for the French market
- Portman - internal tool for managing car listings
- Masterdata - system aggregating car data across European markets
- CarData - tool for importing and processing CSV data
- Medical Case Repository - application for managing patient medical cases
- TNP - web application for doctors to calculate patient dosages
- SmartDoc - AI-based document analysis tool for medical use

EDUCATION

Master's Degree - Automation and Robotics Control

Łódź University of Technology | March 2020 - September 2021

Bachelor's Degree - Automation and Robotics

Łódź University of Technology | October 2016 - February 2020

CERTIFICATIONS

AI Devs 3 - Programming Autonomous Agents and Generative AI Tools

English Certificate - B2

LANGUAGES

English - B2

Polish - Native

ADDITIONAL

Open to remote, hybrid or on-site work
