SUMMARY

Frontend Engineer with 5+ years of experience building high-load web applications and scalable frontend architectures across e-commerce, fintech (payments), and enterprise operational platforms (analytics dashboards, order management, reporting systems).

Specialized in React, TypeScript, and modernization of legacy systems (Backbone, jQuery, AngularJS, JSP -> React) in large production environments.

Experience working on systems serving millions of users, with direct impact on business metrics:

- +10% checkout conversion, reduced failed transactions
- LCP -50%, TTFB -20%
- -40% duplicate API calls, +30% development velocity

Focused on building user-centric solutions that improve conversion, revenue, and user experience.

Experienced in multi-tenant architectures, complex state management (Redux Toolkit, Redux Thunk, RTK Query), and hybrid SSR systems.

Strong collaboration in distributed cross-functional teams (FE, BE, QA, SRE) with focus on performance, scalability, and safe migration from legacy to modern stacks.

WORK EXPERIENCE

Senior Frontend Engineer - DataArt (Poland, Remote) | Apr 2022 - Apr 2026

Project: High-load grocery e-commerce platform (UK, millions of users)

Core Responsibilities & Impact

- Develop and maintain React + TypeScript application (catalog, checkout, payments)
- Actively contributed to migration from Backbone / jQuery / AngularJS + JSP -> React
- Built and evolved parts of multi-tenant architecture (multi-brand platform)
- Implemented SSR with Next.js -> improved SEO and performance

State & Data

- Manage complex state using Redux Toolkit, Redux Thunk, RTK Query
- Optimize data flow and API usage (-40% duplicate requests)

Performance

- Improve Core Web Vitals: LCP -50%, TTFB -20%
- Implement code splitting, lazy loading, and bundle optimization

Payments / Fintech

- Integrate Braintree (PCI DSS), Apple Pay, Google Pay
- Improve checkout flow -> +10% conversion

AWS & Infrastructure

- Work in AWS-based production environment
- Collaborate with DevOps team on frontend delivery setup (CDN, hosting, API integration)
- Ensure correct asset usage, caching behavior, and stable frontend delivery in cloud environment

3rd-Party Integrations

- Integrated RMI (personalization, targeting) and Criteo (retargeting, ads)
- Implemented tracking, personalization, and event-driven integrations
- Contributed to conversion growth and revenue increase

Backend Collaboration & Security

- Implemented Backend-for-Frontend (BFF) layer using Express.js to optimize data fetching, reduce frontend complexity, and improve performance of critical flows
- Applied BFF pattern to decouple frontend from legacy backend constraints
- Designed and enforced Content Security Policy (CSP) aligned with OWASP best practices, mitigating XSS risks
- Collaborated with backend teams (Java, Node.js) on API design, contract definition, and data flow optimization
- Improved frontend-backend interaction by reducing over-fetching and clarifying API boundaries

Monitoring & Reliability

- Implemented Sentry SDK for error tracking and performance monitoring
- Designed logging and alerting strategy for production
- Reduced incident response time (-30%) using Sentry and Kibana

Collaboration

- Participate in architecture discussions, code reviews, and knowledge sharing
- Work in distributed Agile team (FE, BE, QA, SRE)

Tech Stack: React, TypeScript, Next.js, Redux Toolkit, Redux Thunk, RTK Query, AngularJS, Backbone, jQuery, JSP, Handlebars, Node.js, Express.js, REST APIs, SCSS, Jest, React Testing Library, Cypress, Sentry, Kibana

Frontend Engineer - BisonSoft (USA, Remote) | Aug 2020 - Mar 2022

Project: Enterprise automotive platform (analytics, workflows, reporting)

Responsibilities & Impact

- Built data-heavy dashboards and internal tools
- Developed visualizations using D3.js, Chart.js
- Implemented workflows (pricing, invoicing, reporting systems)
- Developed dynamic forms with validation (Formik, Yup)
- Managed state using Redux + Redux Thunk
- Improved internal workflows and reduced manual errors through frontend validation and automation
- Optimized performance via SSR and code splitting
- Maintained ~95% test coverage (Jest, React Testing Library)
- Refactored legacy code and improved maintainability

Tech Stack: React, JavaScript, Redux, Redux Thunk, Material UI, D3.js, Chart.js, Formik, Yup, REST APIs, Webpack, Jest

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+)

State Management: Redux Toolkit, Redux Thunk, RTK Query

Architecture: SSR, multi-tenant apps, legacy modernization (AngularJS / Backbone / JSP -> React)

Backend Integration: REST APIs, Node.js, Express.js

UI: HTML5, CSS3, SCSS, Material UI

Data Visualization: D3.js, Chart.js

Forms: Formik, Yup

Performance: Core Web Vitals, code splitting, lazy loading

Testing: Jest, React Testing Library, Cypress

Tools: Git, Webpack, CI/CD, Sentry, Kibana

Workflow: Agile, code reviews, distributed teams

EDUCATION

Bachelor's Degree - Software Engineer

Institute "Kadry of Industry"

Master's Degree - Finance

Belarusian National Technical University

PROFESSIONAL DEVELOPMENT

React Global Summit (2022-2024)

dev.js Summit Poland (2021-2024)

Frontend Security (OWASP Top 10)

Advanced React & TypeScript

LANGUAGES

English - B2

Polish - B1

Russian - Native
