Education

2023 - 2025

Computer Science, Master's degree

University of Economics and Human Sciences

2019 - 2023

Spatial Planning, Bachelor's degree

Warsaw University of Technology

Technology stack

- TypeScript
- React
- Redux/RTK Query
- Next.js
- CSS
- Node.js/Express.js
- MongoDB/PostgreSQL
- Docker
- Kubernetes

Languages

- Polish - native
- English C1

Adam Fiedko

Frontend Developer

My role as a **Frontend Developer** involves building and optimizing user interfaces, ensuring a seamless user experience. I work with React and TypeScript, manage state efficiently, and implement features like dynamic search, filtering, and interactive components. In my present position, I collaborate closely with designers and backend developers to integrate data smoothly while focusing on performance, accessibility, and SEO best practices. Eager to learn and take on new challenges to grow as a developer.

Work experience

10.2024 - present - rynekpierwotny.pl

Frontend Developer

- Ensure efficient state management using tools like **Redux**.
- Optimize front-end performance (lazy loading, memoization, avoiding unnecessary re-renders - **RTK Query**).
- Maintain and enforce strict **TypeScript** typing and best practices.
- Implement and config tools for **Real User Monitoring - DebugBear**.
- Optimize front-end performance by analyzing bundle sizes, rendering speed, and memory usage.
- Improve SEO and performance through **SSR**, caching, and optimized data fetching strategies.
- Build and maintain **Docker** images for front-end applications.
- Work with Kubernetes to manage containerized applications in production.
- Write unit tests (**Jest, React Testing Library**) to ensure code reliability.
- Perform **code reviews**, ensuring adherence to best practices and maintainability.
- Work closely with backend developers to define API contracts and data structures - **REST API**.
- Collaborate with designers and product managers to implement pixel-perfect UI/UX.
- Develop and optimize applications using **Next.js** (SSR, SSG, ISR, routing, API routes, and performance best practices)
- Monitor logs, performance metrics, and errors in Kubernetes-based environments.
- Style components using external CSS libraries like Emotion or PandaCSS.

04.2023 - 09.2024 - AEC Design

BIM Modeler

- LowCode/NoCode: Creating websites from scratch with authorization&authentication, fetching data from external API, making licensing system for digital products.
- Coding: Creating simple scripts in python and visual programming to automate processes.

Interests

- Formula 1 - I don't watch much sports, but I love Formula 1. I try to watch every race during the season.
- Fantasy science - when I'm not busy, I like to read science fiction books and articles.
- Scandinavia - my favourite geographical region for holidays, love the nature, landscapes and culture.
