Portfolio: [alastapchyk.dev](#)

Results-driven Software Engineer and ETHWarsaw 2025 Hackathon Winner. Mentored by a Google Engineer in DSA. Specialized in building high-performance, full-stack web and mobile applications within the React and Node.js ecosystems. Independent self-starter who published a successfully monetized mobile game to the Google Play Store at age 17. Stood out during the Sui hackathon in Poland and was sponsored to travel to France for a week-long Sui Paris Bootcamp. Actively seeking a full-time engineering role to build scalable, user-focused products.

## Technical Skills

---

**Frontend:** JavaScript (ES6+), TypeScript, React, React Native, Next.js, Vite, Webpack, Redux, Zustand, HTML, CSS, SASS, Tailwind, Motion, Three.js, StoryBook, Figma

**Backend:** Node.js, Express, NestJS, MongoDB, Firebase, Supabase, SQL (PostgreSQL, MySQL, SQLite), Prisma, Redis, JWT, WebSockets, GraphQL, REST

**DevOps & Testing:** AWS, Docker, CI/CD, GitHub Actions, Git, Jest, React Testing Library, Playwright

## Education

---

**Bachelor of Engineering (BE):** Software Engineering and Mobile Technologies

WSEI University | Lublin, Poland | 2022 - 2026 | Graduated

**Awards:** Awarded a merit-based scholarship for two years for ranking in the **top 10%** of students based on academic performance.

## Languages

---

Russian – Native | Polish – B2 (Certificate) | English – B2

## Professional Experience

---

**Technical Co-Organizer & Lead Developer** | [Kosmiczny \(Space\) Bootcamp](#) | Apr 2025

- Engineered a high-performance 3D landing page using Next.js and Three.js, serving 750+ pre-event visits with fluid WebGL rendering.
- Implemented a privacy-first, cookie-less analytics strategy using GoatCounter to analyze user engagement metrics and evaluate the effectiveness of marketing funnels.
- Collaborated cross-functionally with co-organizers to translate event requirements into a pixel-perfect UI, ensuring a clear information hierarchy for visitors.

**Co-Creator & Backend Developer** | [Automated Resource Telegram Bot](#) | Mar 2024

- Engineered and deployed a multi-tenant Node.js and PostgreSQL application for automated blockchain resource management, containerized with Docker and hosted on a VPS.
- Integrated TronWeb APIs and utilized long-polling to process real-time user requests, automating wallet verification, cost calculation, and transaction monitoring.
- Architected a scalable backend featuring command handlers and an internationalization (i18n) system to support a seamless experience for a multilingual user base.

### **Freelance Frontend Developer** | [Dormit](#) | Oct 2023 – Nov 2023

- Engineered a high-performance, responsive commercial website for an excavator services business using React, Next.js, and SCSS.
- Integrated a headless Sanity CMS, allowing the client to independently manage and update site content without developer intervention.

### **Independent Developer** | [Cube Aside \(Mobile 3D Game\)](#) | Aug 2021 – Apr 2022

- Engineered and published a commercial 3D mobile game to the Google Play Store using Unity and C# across a 9-month development lifecycle.
- Built an end-to-end production monetization pipeline by integrating Google Play Services, AdMob, and Unity Services to serve real-world ad impressions and handle In-App Purchases.

## **Selected Technical Projects**

---

### [Finance Tracker Mobile App](#) | React Native, Expo, NestJS, PostgreSQL, AWS

- Engineered a full-stack, offline-first mobile application featuring secure Clerk authentication and automatic currency conversion for real-time net worth tracking.
- Developed an Optimistic UI with background synchronization, ensuring an instant and seamless user experience regardless of network connectivity.
- Achieved a fluid 60+ FPS interface by building high-performance UI components and interactive charts using React Native Reanimated and Skia.

### [Pracuj.pl Clone \(Job Platform\)](#) | Next.js, Supabase, DrizzleORM, PostgreSQL

- Built a comprehensive, open-source job board platform with a focus on web accessibility (WCAG), ensuring inclusive UI for resume uploads and search filters.
- Implemented advanced, role-based workflows allowing employers to post jobs, manage candidates, and access recruitment analytics.
- Engineered robust user features including complex search filters with pagination, profile creation, application tracking, and resume uploads.
