PROFESSIONAL SUMMARY

Frontend React Developer with 5+ years of experience, including co-building a live, production-grade MSP cybersecurity SaaS platform from scratch as one of two frontend engineers. Specialises in scalable component architecture, performance optimisation, and data-heavy dashboards using React, TypeScript, and TanStack Query. Comfortable owning large parts of a product end-to-end and collaborating closely with product, design, and backend teams.

SKILLS

Frontend: React, TypeScript, JavaScript (ES6+)

UI Engineering: HTML5, CSS3, SCSS, Responsive Design, Cross-browser Compatibility

Architecture: Component-based architecture, Design Systems, Reusable UI libraries

State Management: TanStack Query, Zustand

Data Visualisation: Chart.js

Quality: UI Performance Optimisation, Code Reviews, Maintainability

Tools: Git, React Router, yup, zod

Collaboration: UX/UI collaboration, Agile development, cross-functional teams

AI-Assisted Development: Claude, GitHub Copilot, ChatGPT — code review, debugging, accelerating development workflows

WORK EXPERIENCE

Frontend React Developer – **Devkit** – Warsaw, Poland

February 2023 – Present

- Co-built a live, production-grade MSP cybersecurity and compliance platform from scratch as one of two frontend engineers, taking broad end-to-end ownership across multiple product modules used by real customers
- Designed and maintained a reusable React/TypeScript component library used across the entire platform, improving development speed and consistency
- Improved load performance by rearchitecting the Icon component to lazily load from a library of 200–300 icons on demand, eliminating unnecessary upfront bundle weight
- Implemented dashboards, data visualisation (Chart.js), search and filtering, authorisation flows, and feature flags across a complex multi-module product
- Managed asynchronous data flows and server state caching with TanStack Query, optimising rendering performance in data-heavy views
- Collaborated directly with product managers, designers, and backend engineers; contributed to onboarding and mentoring of new team members

Front-End Engineer – **Grid Dynamics** – Kharkiv, Ukraine

July 2022 – November 2022

- Developed reusable React components for a large-scale US e-commerce platform
- Followed shared UI architecture standards to ensure consistency and scalability
- Improved frontend reliability by implementing unit tests with Jest
- Collaborated with cross-functional teams in an Agile environment

- Mentored junior developers and supported onboarding

Junior Software Engineer — **Grid Dynamics** — Kharkiv, Ukraine

April 2021 — July 2022

- Built a production-grade SPA using React and Webpack
- Developed responsive UI components with HTML, CSS, and JavaScript
- Participated in Agile processes including sprint planning and retrospectives
- Contributed to internal frontend tooling and infrastructure improvements

Markup Developer (Freelance) — **Self-employed** — Kharkiv, Ukraine

December 2019 — May 2020

- Delivered responsive and cross-browser compatible layouts for client projects

EDUCATION

Bachelor's Degree in English Philology

Moldavian State University | 2009 — 2014

Bachelor's Degree in Information Technologies (in progress)

Free International University of Moldova (ULIM)

CERTIFICATIONS

Front-End Pro — Hillel IT School, 2021

Front-End Basic — Hillel IT School, 2021
