- JAVASCRIPT
- REACT JS
- NEXT JS
- TYPESCRIPT
- Node.js/express.js
- MongoDB
- TAILWIND
- ANT DESIGN
- MATERIAL UI
- HTML & CSS

Basic knowledge of
React Native

LANGUAGE

- Georgian (native)
- English B1
- Russian C1

WORK EXPERIENCE

OPTIMO GROUP Front end developer

2022 - ongoing

- Expert in **Next.js** with 4+ years of professional experience building production-grade web applications . Including SSR (Server-Side Rendering), SSG (Static Site Generation), and ISR (Incremental Static Regeneration) for optimized performance and scalability
- Backend experience with **Node.js**, **Express js**, and **MongoDB** (REST APIs, authentication, and data modeling, payments)
- Proficient in **SEO** optimization using next/head, structured data, metadata API
- Integrated marketing & analytics tools into Next.js apps, including **Google Tag Manager**, **Meta Pixel**, **Google Analytics** (GA4), **Hotjar**, and Cookie Consent management
- Advanced understanding of **caching**, revalidation, and .next optimization in large-scale projects
- Passionate about UI **animations**, using **Framer Motion** to create smooth, interactive experiences;
- Experienced with **Redux** Toolkit for state management in React applications

SOFTGEN Group Front end developer

2021 - 2022

- Built scalable frontends using functional components, hooks (useState, useEffect, useContext, etc.), and custom hooks, Integrated third-party libraries such as Swiper, React Query, React Hook Form, and **Ant Design** (AntD)

IN STORE Front end developer

2020 - 2021

- Creating Maintaining Mobile and Responsive Design

LIVE PROJECTS

SOCAR socar.georgia.petroleum

Fully developed the entire frontend of the application, handling everything from architecture design to pixel-perfect UI implementation. Built with Next.js v14 (ISR & SSG rendering), React Query, Framer Motion, Ant Design, Tailwind CSS, Redux Toolkit, and Google Maps integration.

[FSGPOST.COM](https://fsgpost.com)

FSG POST – Designed and developed a full-stack logistics management web application using Next.js (frontend) and Node.js/Express (backend). Integrated BOG payment processing, built RESTful APIs, and managed data with MongoDB. Deployed on a Hetzner Linux VPS.

celsiusi.ge

using Next.js (with ISR & SSG rendering, v13), React Query, Ant Design, and Tailwind CSS, next auth .

vitaapp.ge

Partially contributed to the frontend development of the application built with Vite,
