SUMMARY

Analytical and data-oriented professional with a dual academic background in law and management, combined with commercial experience within financial operations and analytical processes. Strong understanding of financial data analysis, regulatory environments, operational risk, compliance frameworks, and transaction-related controls. Skilled in Excel, SQL, and data-driven problem solving, with the ability to interpret complex datasets and identify operational inconsistencies or risk indicators. Experienced working in an international corporate environment requiring accuracy, process discipline, stakeholder communication, and adherence to international standards. I am particularly interested in analytical, compliance, AML/KYC, regulatory, legal operations, and risk-oriented roles within the financial sector.

PROFESSIONAL EXPERIENCE

Transaction and cash Analyst in State Street Corporation

2022-Present:

- Perform analytical and operational activities related to financial services processes within a highly regulated international environment.
- Analyze large volumes of financial and transactional data to ensure accuracy, consistency and compliance with internal procedures and client requirements.
- Support risk mitigation processes by identifying discrepancies, investigating data irregularities, and escalating potential issues when required.
- Utilize advanced Excel and SQL functions to extract, validate, reconcile, and interpret financial datasets.
- Participate in process optimization initiatives focused on automation, data quality improvement, and reduction of operational risk.
- Operate in accordance with strict procedures.
- Collaborate with internal stakeholders in an international English-speaking environment.
- Maintain high attention to detail while managing multiple priorities under time-sensitive conditions.
- Contribute to continuous improvement initiatives by identifying inefficiencies and proposing practical process enhancements.
