PROFESSIONAL PROFILE

Java Full Stack Developer with 5+ years of experience building production web applications on Spring Boot. I design REST APIs, implement complex business logic, and build scalable, maintainable systems. Frontend with React, Next.js and TypeScript; AI/LLM integrations, Stripe, OAuth2, and cloud deployments. Strongly focused on **performance, SQL query optimisation, multithreading**, and delivering clean, well-tested code.

EXPERIENCE OVERVIEW

► Java Full Stack Developer

Evolution System (03.2021 – 03.2026)

- **Refactored a large legacy system** by introducing Spring layered architecture – significantly reduced maintenance cost and sped up development.
- **Migrated Java 8 → 11 → newer + full Spring stack upgrade** with **zero downtime on production**.
- **Designed and delivered end-to-end REST APIs** (business logic, DB schema, frontend integration) – from client requirements to production.
- **Optimised SQL performance** via Criteria Builder, JPQL, JPA projections, indexes, fetch graphs and N+1 elimination – **all critical views load in under 1 second**.
- **Optimised an existing invoice retrieval microservice and added new AI-assisted parsing** (OCR + AI extraction) – cut processing time **from overnight to ~30 minutes**.
- **Delivered a utility consumption alarm system** (water, energy, heat) that expanded the product offering and **directly contributed to revenue growth**.
- **Built internal microservices (Java 21, virtual threads, REST + JWT)** and fine-grained Spring Security permission checks with unit & integration tests.

SELECTED PROJECTS

[MySongAI](#) – AI-personalised song generator as a gift – lyrics + music, ready in 3 min

[Shop Floor Management](#) – Real-time production monitoring with KPI visualisation and machine control

EDUCATION

► Java Developer

Bootcamp Coders Lab (03.2020 – 10.2020)

► Production Engineering, B.Eng.

Łódź University of Technology (2014 – 2018)

TECHNICAL SKILLS

- **Backend:** Java, Spring Boot/Data JPA/Security/AI, Hibernate, Maven, JUnit, JWT, Swagger, Selenium, WebSockets.
- **Frontend:** JavaScript, TypeScript, React, Next.js, HTML, CSS, Bootstrap, Metronic, jQuery, Thymeleaf.
- **Databases:** SQL, JPQL, MySQL, PostgreSQL, TimescaleDB, Oracle.
- **Cloud:** Heroku, Railway, Vercel, Cloudflare.
- **AI & Integrations:** Spring AI, LLM, Google OAuth2, Stripe, Apache POI, Chrome Extensions.
- **Tools:** Docker, Jenkins, Git, IntelliJ IDEA, JIRA, TDD, Agile/Scrum.
