Portfolio: <https://portfolio-chi-six-34.vercel.app/>

SUMMARY

Frontend Developer experienced in building interactive UI, game interfaces, and scalable web applications using JavaScript, React, and Solid.js. Skilled in UI development, performance optimization, and clean architecture. Familiar with Node.js and MongoDB for full-stack development. Passionate about creating smooth, interactive user experiences.

TECH SKILLS

Languages: HTML, CSS (SCSS, Tailwind), JavaScript (ES6+), TypeScript, SQL (basic)

Frameworks & Libraries: React, Redux, React Router, Solid.js, Axios, Swiper, Formik, Yup, Lodash, Bootstrap

Tools & Platforms: Git, GitHub, Node.js, Express, MongoDB, REST API, Postman, ESLint, Prettier, Vite, Figma, Vercel, Render

Concepts: Responsive design, component-based architecture, accessibility (a11y), performance optimization, modular CSS, debugging

PROJECT / WORK EXPERIENCE

Frontend Developer (Freelance / Personal Projects) | September 2025 – December 2025

Tech: HTML, CSS, JavaScript, SCSS

- Built responsive websites with optimized layouts, improving load performance and mobile usability
- Implemented layouts and interactive elements (sliders, modals, forms).
- Optimized code for cross-browser compatibility and mobile devices.
- Collaborated with clients to gather requirements and test final products.
- Worked on multiple small-scale projects (landing pages, UI components)
- Delivered production-ready UI components based on client requirements

Frontend Developer — Mobile GTA Project | September 2025 - January 2026

Tech: Solid.Js, TS, SCSS, WEBSOCKET

- Built dynamic in-game UI and interactive mini-games (menus, animations, user flows)
- Designed scalable architecture using Solid.js and modular SCSS
- Improved performance by refactoring legacy code
- Created UI/UX prototypes in Figma aligned with sponsor requirements
- Integrated UI with game logic and backend systems

Team Project — DIVElopers

Tech: HTML, CSS, JAVASCRIPT

- Developed interactive web application using vanilla JavaScript
- Collaborated in a team using Git (PRs, branching, code reviews)

GitHub: <https://github.com/kulakaa073/DIVElopers-js-project>

Live Demo: <https://kulakaa073.github.io/DIVElopers-js-project/>

Adaptive Layout Project

Tech: HTML, CSS, JAVASCRIPT

- Built responsive layout using SCSS (variables, mixins, adaptive design)

GitHub: <https://github.com/Kirilko-frontend/Positivius>

Live Demo: <https://kirilko-frontend.github.io/Positivius/>

Intern — Golden Sun Mobility Center, Greece | May 2023

- Assisted in building internal web tool (UI + database integration)
- Configured OS environments (Windows/Linux)

SOFT SKILLS

Problem solver • Detail-oriented • UX-focused • Adaptable • Team player • Code quality advocate

LANGUAGES

English — Intermediate | Polish — Intermediate | Ukrainian — Native | Russian — Native

EDUCATION

Technical College, Poland (2020 – 2025)

Computer Science Technician
