PROFILE SUMMARY

Software Engineer

With a deep passion for programming and graphic design, I have grown into a proficient Software Engineer with a strong background in Frontend Engineering and Robotic Process Automation. I build responsive, high-performance web interfaces using Vue, React, Tailwind, and Node, and develop robust automation workflows for web and desktop environments with UiPath and OpenRPA to streamline business operations.

Key Skills / Areas of expertise:

- Strong proficiency in JavaScript, TypeScript, HTML5, CSS3, SCSS, Vue.js 2/3 (options & composition API), React, Node.js, Express and REST APIs,
- Competence in utilizing development tools such as GIT, Azure DevOps (CI/CD pipelines), Azure Functions, GitHub, GitLab, Jira, Confluence, and Bitbucket.
- In-depth knowledge of SEO best practices, performance optimization, and responsive web design (RWD).
- RPA robots development and orchestration in UiPath and OpenRPA & OpenCore.
- Active participation in agile methodologies and collaborative development within Scrum teams.
- Collaborate with cross-functional teams to design and implement new features.
- Ensure the technical feasibility of UI/UX designs.
- Optimize applications for maximum speed and scalability.
- Participate in code reviews and contribute to best practices.
- Participate in sprint reviews together with stakeholders and management.

PROFESSIONAL EXPERIENCE

Software Engineer (since 2026)

[KMD Poland Sp z o.o.](#)

The largest international branch of KMD Group, delivers key IT, Finance, HR, and Support solutions providing digital transformation for Nordic businesses and public sector organizations.

- Developed RPA robots UiPath and OpenRPA, integrating with SAP S/4HANA, Excel, and Outlook to streamline data processing and business workflows.
- Robots orchestration and setup for unattended operations.
- Technological stack included UiPath, OpenRPA, OpenCore, Node-RED, Docker, VB.NET, C#, Azure

Maintained existing UiPath robots and led the migration to OpenRPA. Contributed to multiple automation projects for the finance and HR departments. Designing WWF workflows, developing scalable web data-extraction routines, and automating form processing through precise, rule-based UI element interaction. I provided a cost-effective alternative to UiPath, significantly reducing licensing expenses while ensuring automation efficiency.

Frontend Engineer (since 2023)

[KMD Poland Sp z o.o.](#)

- Developed RWD website modules for Umbraco CMS, based on provided CVI & UI style guide.
- Developed Microsoft Extensions for Azure DevOps with Azure Functions,
- Utilized Pixel Perfect, SEO and performance best practices.
- Technological stack included JavaScript, TypeScript, HTML5, CSS3, SCSS, .NET, C#, Vue 3 (composition API), React 19 (hooks, Context API), PrimeVue, Ant Design, Storybook, REST API, GIT, Azure DevOps, Azure Functions.

In this role, I played a key part in driving the digital transformation of Nordic businesses, ensuring application optimal user experience and empowering content editors to create professional layouts efficiently. The project environment allowed me to create and enhance a wide range of reusable components and functionalities that have a direct impact on business operations and digital presence. I also developed and optimized an internally used time tracking application, which, built as an Azure DevOps extension integrated with ERP system, provides a convenient way to track work items assigned to users.

Frontend Developer (2022 – 2023)

[Pixel Technology Sp. z o.o.](#)

The company delivers IT solutions for radiology and public administration, specializing in medical imaging and government operations software.

- Developed a sophisticated SPA application for managing advanced medication dispensing machines.
- Technological stack included JavaScript, TypeScript, HTML5, CSS3, SCSS, Vue 3 with options & composition API, Vuex, Vue Router, VuePress, Jest, Java, PostgreSQL, REST API, GIT, GitLab, Jira, Confluence.

While working in this position, I developed a sophisticated Single Page Application (SPA) for medication dispensing machines, in collaboration with healthcare professionals. This software significantly reduced medication costs, improved ordering processes, and enhanced patient care, marking a substantial advancement in hospital operations and pharmaceutical cost control.

JavaScript Developer, Intern (2021 – 2022)

[ExLibris Mateusz Wróbel](#)

IT services for software and application development.

- Developed SPA application for HR resources.
- Technological stack included JavaScript, TypeScript, HTML5, CSS3, SCSS, Vue 2, Vuex, Vue Router, Jest, GIT, Bitbucket, Jira.

IIoT iSmart Factory Software Application Engineer (2019 – 2022)

[Yamazaki Mazak Central Europe Sp. z o.o.](#)

Leading manufacturer of advanced machining centers, CNC controls, laser cutters, and automation solutions.

- Implemented IIoT application for monitoring the operation of CNC machine tools for manufacturing companies.
- Developed user interfaces.
- Technological stack included MTConnect industrial protocol, Microsoft SQL server, JavaScript, TypeScript, HTML5, CSS3, SCSS, GIT, Github.

Utilizing Industry 4.0 concepts, I implemented smart factory solutions to create a connected and automated manufacturing environment. Additionally, I developed web extensions for data acquisition software, leveraging modern web technologies to enhance user experience and functionality. This improved manufacturing process management by reducing downtimes and maximizing machines utilization and performance.

Senior Sales Professional (2012 – 2019)

[High Technology Machines Sp. z o.o.](#)

Distributor of CNC machine tools specializing in comprehensive integration of machining process automation systems.

- Created strong business relations with clients in terms of machine tools sales and manufacturing process optimization.
- Delivered projects across the domestic market.
- Represented our company as an exhibitor at leading European machine tool fairs.

I worked closely with manufacturing companies in the automotive and aerospace sectors. My role involved creating strong relationships with clients, focusing on machine tools sales and manufacturing process optimization. After analyzing machining processes at the production plant shop floor, I implement automated Flexible Manufacturing Systems (FMS), which empower those companies by enhancing their competitiveness in the industry.

EDUCATION

[Software Development Academy](#)

Frontend Developer

Bootcamp; 2020

JavaScript, TypeScript, functional & object oriented programming, HTML5, CSS3, SCSS, Angular, principles of best practices in software development, final project.

[Poznań University of Technology](#)

Postgraduate studies in Database Systems; 2008 – 2009

Oracle SQL database systems

[Poznań University of Technology](#)

Industrial Engineering; 2007

M.Eng., Industry Engineering

Thesis: „Flexible Manufacturing System design at SKF Poznań S.A.”

Federation of Engineering Associations (NOT) diploma

LANGUAGE SKILLS

Polish – native

English – fluent (C1)

HOBBIES

- **Graphic Design**
I design raster and vector graphics using Adobe Photoshop and Illustrator, creating visually engaging content.
- **Music**
I am a music producer and DJ, utilizing Ableton and FL Studio to craft unique sounds and beats.
- **Sport**
I am a TRX certified personal trainer, helping others achieve their fitness goals through tailored training programs.
