

OLAF CHUSZNO

FRONTEND DEVELOPER

Warsaw, Poland | Open to remote • +48 573 568 210 • chuszno.dev@gmail.com • [LinkedIn](#) • [Portfolio](#)

SUMMARY

Frontend developer with 3 years of experience building data-heavy, AI-driven enterprise applications in React, Next.js, and TypeScript. Led frontend architecture and security design on two production AI/RAG products for international retail clients. Comfortable owning features end-to-end across architecture, performance, internationalization, and mentoring - with full-stack work in Node.js, NestJS, and PostgreSQL.

WORK EXPERIENCE

Frontend Developer | SMART business (full-time)

October, 2024 – Present

- Delivered 4 AI-driven enterprise applications (individually and in 5–10 person frontend teams) for large international retail clients, including an ML system serving McDonald's Georgia.
- Sole frontend developer on 2 large AI/RAG projects - owned Frontend architecture, security design, BPMN documentation, onboarding and preparing customer demos.
- Improved frontend team development speed by 84% by implementing Hot Module Replacement across a mature .NET + React stack.
- Owned internationalization for flagship apps across 5 locales; built a Node.js + TypeScript tool that generates translator-ready Excel files from JSON, cutting preparation time by 5x and eliminating manual errors completely.
- Mentored 2 frontend developers to first production PRs within 2 weeks; led 30+ cross-functional design meetings and authored 100+ BPMN process diagrams for flagship app core flows.
- Designed and presented 2 internal training courses on modern frontend and AI tooling (Next.js, AI MCP, WebAssembly, Svelte) that elevated Frontend team skills and self-confidence in the newest technologies.

Next.js Developer | 4spacje (full-time)

September, 2023 – October, 2024

- Built and maintained full-stack tech blog platform using Next.js 14 and MongoDB.
- Designed error-handling architecture and accessibility-compliant UI.
- Conducted code reviews, shipped new features, participated in team meetings.

Frontend Developer | Kodree (internship)

April, 2023 – September, 2023

- Developed responsive web applications using Next.js, React, TypeScript, Redux Toolkit.
 - Translated requirements from L&D specialists into technical solutions; wrote unit tests and contributed to UI/UX.
-

SKILLS

- **Frontend** - TypeScript, React, Next.js, Redux/Toolkit, Zustand, i18n, TanStack Query+Table, SWE, Axios, SignalR, WebSockets, MSAL, Vite, Webpack, JavaScript, Tailwind, Styled-components, Sass, Shadcn/ui.
 - **Backend** - Node.js, Express.js, NestJS, REST, Prisma ORM, PostgreSQL, Better Auth, Passport.js.
 - **Testing** - Jest, Vitest, Cypress, Playwright.
 - **Platforms** - Azure, Vercel, Railway, GitHub/Actions, Codex, MCP Servers.
 - **Tools** - Docker, CI/CD, Figma, Claude Code, Codex, MCP Servers.
-

SELECTED PROJECTS

AI-Powered RAG Chatbot Widget [↗](#) - React, Node.js, Express, PostgreSQL

- Sole frontend developer; built full-stack POC and onboarded 2 backend engineers who scaled it to a C# .NET MVP using my original architecture and security design.
- Designed and implemented secure cross-origin iframe communication working reliably across desktop and mobile, solving non-trivial mobile iframe limitations.
- Designed token-based security with invalidation and anomaly tracking to prevent unauthorized LLM token usage on a public, login-less product.
- Built WebSocket message streaming that achieved 90% faster perceived response time.
- Achieved near-perfect Lighthouse scores via code splitting, tree shaking, and disciplined library selection (e.g., zod/mini).

Demand Forecast (Enterprise ML SaaS) 2 - React, Redux, SignalR, MSAL

- Integrated REST APIs and WebSockets for product management + promotional campaigns of large retail clients.
- Designed an abstract multi-step / hierarchical form framework that cut form development time by ~85%.
- Implemented HMR in a mature .NET + React app that improved Frontend development speed by 84%.
- Built a large-data file download flow with cross-device compatibility for desktop, tablet, and mobile.
- Onboarded 2 frontend developers - both shipped first production PRs within 2 weeks.

Marketing Hub - Next.js (v16), React, Prisma ORM, PostgreSQL, SCSS, SEO, CRM

- Designed and built an interactive multi-step form builder that replaced manual per-form developer configuration, speeding up new-form delivery by ~150% and form updates by 3x.
- Integrated customer-facing form builder with an existing CRM, improving lead response time by ~20% thanks to centralized data and faster lookups.
- Improved core page metrics with SSG and ISR strategies: LCP 4.0s -> 0.65s (6× faster), CLS reduced by ~10x.

Price Insight (AI-driven pricing platform) 2 - React, Redux Toolkit, SignalR

- Built core reusable UI components used by a team of 6 developers, and complex dataset-aggregation logic for Power BI reports with update functionality (reducing report compute by ~60%).
- Led 20+ cross-functional design sessions with product owners, business analysts, designers, backend / data engineers, data scientists and frontend peers to align scope before implementation.

CRM Copilot Chat (MS Power Platform) 2 - React, Power Apps, MSAL, WebSocket, React Query, Vitest

- Built an AI assistant for CRM consultants that centralized customer-specific data and context for AI agents, reducing context-switching during support calls.
- Served as the sole frontend developer, owning frontend architecture, implementation, and delivery of core features from concept to release.
