

Tendekayi Gomo

QA AUTOMATION ENGINEER

+48 511 352 370 | gomotjbs@gmail.com | linkedin.com/in/tgomo1532 | Warsaw, Poland

PROFESSIONAL SUMMARY

I am an ISTQB Certified Tester and Computer Science graduate (BSc, March 2026, GPA 4.0+) with 2+ years of commercial QA experience, applying for the junior band. My automation background is commercial and practical: I have built and maintained UI test suites using Java, Selenium WebDriver, and TestNG, designed API integration tests using REST Assured, structured BDD scenarios in Cucumber and Gherkin, and contributed to a Maven-based framework with CI/CD integration readiness - all within live delivery teams at Testronic. I have studied the Page Object Model pattern and am actively applying it in independent Playwright work, having built a structured web automation project independently outside of my commercial role.

On the broader technical side I bring solid REST API testing experience using both Postman and REST Assured, working SQL knowledge applied commercially, and basic hands-on exposure to MongoDB and Docker gained through personal study. My programming foundation is in Java, with JavaScript knowledge built through university coursework and structured self-study - TypeScript is the natural next step and one I am actively developing towards. I understand how automated testing fits into CI/CD pipelines and have contributed to Git/GitHub workflows including branching, pull requests, and peer code review.

I am based in Warsaw, available immediately, and well-suited to the hybrid model. I am applying at the junior level and looking for the kind of environment where I can develop quickly inside experienced technology teams - the focus on Playwright and TypeScript as a modern QA ecosystem is exactly the direction I want to grow in. I would very much welcome the opportunity to speak with the team. Fluent English C2 (LanguageCert certified). Visa sponsorship not required.

PROFESSIONAL EXPERIENCE

QA Lead Support

September 2025 - Present

Testronic Sp. z o.o. | Warsaw, Poland

- Analysing business and technical requirements to design and structure test cases and scenarios - applying risk-based coverage principles within an Agile sprint delivery cycle.
- Identifying, reporting, and tracking defects through the full lifecycle in Jira - contributing to triage decisions, severity assessment, and resolution tracking with development teams.
- Communicating test progress, quality risk, and coverage status to QA leads and project stakeholders - producing written reports to support release and quality gate decisions.
- Using SQL and Excel for build tracking, task allocation, and test data preparation across multiple concurrent projects.

Automation QA - Live Support Application

September 2024 - March 2025

Testronic Sp. z o.o. | Warsaw, Poland

- Designing and maintaining automated UI test scripts using Java, Selenium WebDriver, and TestNG - applying OOP principles and structured test architecture to produce clean, maintainable regression coverage.
- Building automated API integration tests using REST Assured - verifying HTTP GET/POST endpoints, data consistency between client and server, and error handling behaviour across connected services.
- Contributing to a Maven-based automation framework with CI/CD integration readiness; version-controlled in Git/GitHub with branch management, pull requests, and peer code review alongside development engineers.
- Building BDD test scenarios in Cucumber and Gherkin - producing structured, human-readable documentation for technical and non-technical stakeholders.

OTT & Streaming QA

February 2024 - June 2024

Testronic Sp. z o.o. | Warsaw, Poland

- Performing API testing with Postman - verifying service endpoints, analysing HTTP response structures, status codes, and error handling; documenting findings for development review.
- Executing Python-based SDK scripts to drive semi-automated validation routines - analysing logs and diagnosing issues prior to production deployment.
- Designing and executing functional, integration, and regression test cases across web, mobile, and Smart TV platforms within a continuous deployment environment.
- Participating in daily Agile standups - tracking progress, escalating issues, and aligning priorities with the development team and QA lead.

Manual QA Technician

July 2022 - January 2024

Testronic Sp. z o.o. | Warsaw, Poland

- Creating and executing structured test cases in TestRail across mobile, desktop, and web platforms - documenting results against acceptance criteria across multiple concurrent projects.
- Logging detailed defect reports in Jira with reproduction steps, severity classifications, and supporting artefacts - enabling efficient triage within release windows.
- Maintaining documentation in Confluence and collaborating across QA, development, and project management in a distributed international team.

PERSONAL PROJECTS

Web Automation - OLX / Otodom Data Extraction

Independent project - Playwright, Python, machine learning pipeline input

- Built a structured Playwright automation framework to extract data from olx.pl and otodom.pl - applying Page Object Model principles, web element locator strategies, and cross-page navigation flows against real-world dynamic site structures.
- Output feeds a machine learning application model - requiring reliable, consistent extraction logic with validation to catch structural changes in target sites.

Jokes API - BDD Quality Engineering Framework

Independent project - github.com/gomo-t14/JokesAPI-BDD

- Designed and built a Java API automation framework using REST Assured, Cucumber/Gherkin, and TestNG - applying OOP design principles to produce a clean, extensible codebase covering smoke, regression, and integration scenarios.
- Configured Maven for build management with CI/CD readiness; fully version-controlled in Git/GitHub. Demonstrates ability to deliver a quality engineering solution end-to-end without supervision.

TECHNICAL SKILLS

UI Test Automation	Selenium WebDriver + TestNG (commercial, Java) · Playwright (independent projects, structured framework with POM) · web element locators, cross-browser and cross-platform execution
API Testing	REST Assured (commercial, automated integration tests) · Postman (commercial, manual and exploratory validation) · HTTP/REST protocols, JSON/XML, status codes, request/response analysis
Frameworks & Patterns	Cucumber/Gherkin (BDD, commercial) · Page Object Model (studied; applied in Playwright project) · Maven (build management, CI/CD readiness) · OOP design principles
Programming Languages	Java (commercial, primary automation language) · Python (scripting and SDK automation) · JavaScript (university coursework and structured self-study) · SQL (commercial)
Databases	SQL - queries for test data preparation and build tracking (commercial) · MongoDB - basic hands-on exposure through personal study
Version Control & CI/CD	Git, GitHub (branching, pull requests, peer code review, commercial) · Maven CI/CD integration readiness · Docker - basic hands-on exposure · CI/CD pipeline concepts (Jenkins, GitLab CI - foundational understanding)
Defect & Test Management	Jira (defect lifecycle, triage, severity classification) · TestRail (test case management) · Confluence (documentation, knowledge sharing)

Agile & Collaboration

Scrum, sprint planning, daily standups - cross-functional collaboration with developers, DevOps, and project stakeholders in distributed international teams

Communication

English C2 (LanguageCert certified) - fluent written and spoken; technical documentation; defect and test progress reporting

JOB PREFERENCES

Availability: Immediate - 1 week notice (courtesy only, not contractually enforced)

Work Mode: Hybrid - Warsaw (1-2 days on-site)

Contract: UoP (Contract of Employment)

Visa Sponsorship: Not required

CERTIFICATIONS

ISTQB - Certified Tester Foundation Level (CTFL)
Testing principles, methodologies, and QA best practices

LanguageCert Level 3 ESOL - C2 Proficiency
Fluent English - written and spoken

AWS Solutions Architect Associate (SAA-C03)
Cloud infrastructure and system architecture

AWS Data Engineer Associate (DEA-C01)
Data systems and infrastructure architecture

EDUCATION

BSc Computer Science - Graduated March 2026
Uniwersytet Vizja, Warsaw - GPA 4.0+ - Grade 5.0

Relevant modules:
Software Engineering · OOP · Databases (SQL) · Security of Web Applications · Computer Systems Architecture · Operating Systems · AI & Machine Learning

I hereby give consent for my personal data included in my application to be processed for the purposes of the current and any future recruitment processes, in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (GDPR).
