📄 PROFILE

Experienced React Frontend Developer with over 3 years of building scalable and maintainable web applications. Skilled in React, Redux, RTK, and TypeScript, with experience implementing real-time features via web sockets. I thrive in cross-functional Agile teams and focus on delivering high-quality, intuitive user experiences. Always eager to learn and take on complex challenges.

📁 EXPERIENCE

LG Energy Solution

Frontend Developer

10/2023 – Present | Wrocław, Poland

Unified platform for lithium-ion battery production cycle automation and quality control.

- Built real-time dashboard modules for machine status and batch tracking using Shadcn-UI and React-virtualized to handle high-frequency data without performance drops.
- Integrated Sentry for error tracking with source maps, reducing software-related downtime by 30% by accelerating debugging of interfaces interacting with PLC via REST APIs.
- Developed a dynamic constructor for digital checklists and QC forms using React Hook Form with Zod validation, adaptable to various battery chemistries and technical specs.
- Designed inventory management UI with batch-number filtering and real-time warehouse sync via RTK Query.
- Optimized rendering of high-density analytical charts with code splitting, memoization (React.memo, useMemo, useCallback).

COMFY

React Developer

09/2022 – 10/2023 | Remote

Development and optimization of a high-traffic electronics marketplace and internal retail management systems.

- Built a high-performance storefront with advanced filtering and full-text search, integrated via RTK Query for real-time pricing and stock synchronization.
- Improved LCP and CLS metrics on PDP and PLP pages via lazy-loading, code splitting, and memoization - critical for SEO and user retention.
- Implemented React-virtualized for infinite product scroll, maintaining 60 FPS across thousands of catalog items.
- Developed a flexible checkout form constructor with React Hook Form and Zod, handling complex delivery logic and pickup point selection.
- Integrated Sentry for real-time bug detection in Checkout flow, improving payment transaction success rate.

🧠 HARD SKILLS

Frontend

- React
- Next.js
- Redux / RTK
- TypeScript
- JavaScript
- React Router DOM
- React Hook Form
- SCSS / CSS
- Tailwind
- Webpack / Vite
- RTK Query

Additional Tools

- Git
- Postman
- Jest
- Sentry
- CI/CD

🎓 EDUCATION

Bachelor's Degree in Automation and Computer-Integrated Technologies

Ivano-Frankivsk National Technical University of Oil and Gas

09/2017 – 06/2021 | Ivano-Frankivsk, Ukraine
