// PROFILE

Frontend Engineer with **5+ years of experience** developing responsive web applications and cross-platform desktop solutions for real-world use. Proficient in React, Vue, TypeScript, WordPress, and Electron, as well as HTML, CSS, and UI frameworks like Tailwind CSS and Bootstrap. Strong focus on building maintainable and scalable interfaces, improving user experience, and working closely with cross-functional teams.

EXPERIENCE

Frontend Developer

03.2025 – 04.2026

MITSp. z o.o.

Lublin, Poland

- Built cross-platform desktop apps with Electron + React and real-time WebSocket integration
- Developed modern web platforms from landing pages to complex service dashboards
- Styled with SCSS and TailwindCSS; integrated Twig templates in server-rendered projects
- Implemented unit and E2E testing practices; collaborated with designers and back-end teams

React Developer

03.2024 – 12.2024

SolidWay

Warsaw, Poland

- Designed and built responsive front-ends with React, TypeScript, Redux and SCSS
- Achieved **50% navigation efficiency** improvement and **35% mobile traffic** growth
- Engineered real-time crypto platform with WebSocket live price tracking
- Optimized REST API performance, reducing load times by **20%**

Frontend Developer

04.2023 – 02.2024

BelSoft

Minsk, Belarus

- Led real estate platform, education portal, and travel booking site development
- Boosted user engagement by **25%** through interactive features and performance work
- Served as Project Manager overseeing a team of 8 developers

Frontend Developer

2021 – 2025

Freelance

Lublin, Poland

- Delivered responsive solutions with React, HTML, CSS, Bootstrap and TailwindCSS
- 35% mobile traffic increase, 25% engagement boost, 20% faster load times
